Subject: Thank you

Sarah,
Please accept my sincere appreciation for the Encina tour provided by you and David Lloyd last Friday.

It was fascinating to see the photographic history of the construction of the facility and the dredging of the lagoons. The tour of the existing plant is an amazing step back into the history of producing electricity. The old building shell has enormous potential for multiple future uses.

I was very impressed to see the production of Mussels, Abalone, Oysters, and Seahorses in the lagoon. These environmentally supportive operations indicate concerns and accomplishments of NRG which are rarely publicized and underappreciated. It's a shame that the other lagoons in Southern California are without management that allows for public use and far reaching benefits.

Perhaps the most important part of the tour was the easterly section of the property, the proposed locations for the new power and Poseidon water production facilities. I now believe that the construction of the new NRG facility and Poseidon water facility on this location will be a benefit to the City of Carlsbad as well as all users of electricity and water in Southern California. The land and location seem logical, crying out for utility production use, perfect for the proposals. I see no genuine conflicts with any adjacent property uses, including the freeway which cries out for improvements in horizontal and vertical alignment notwithstanding the NRG proposal.

The eventual result of NRG's efforts in Carlsbad and east county will facilitate the availability a large coastal property for development with limitless possibilities. The city of Carlsbad and it's citizens with concern for the future of Carlsbad should be supportive of this project.

Please pass along my thanks to David Lloyd.
I am now a supporter of the NRG proposal.
Bruce Wolfe
