CALIFORNIA ENERGY COMMISSION
REPORT OF CONVERSATION

Systems Assessment and Facilities Siting Division

FILE: 12-AFC-02

PROJECT TITLE: HBEP

☒ **Telephone** (949) 439-5312	☐ **Meeting Location:**	
NAME: Felicia Miller	**DATE:** 10/1/12	**TIME:** 3:45 pm
WITH: Robert Mason, CH2MHill		
SUBJECT: Construction Details		

As a follow up to staff's data requests for additional construction details, Robert and I discussed some of the proposed project facilities included in staff's data requests. Specifically, staff has asked requested depth and horizontal extent of excavations for a number of proposed project facilities, in addition to block 1 and 2 CCGT's.

As a number of project facilities were called out in the data request, we were able to confirm that the existing HBGS fire protection system will be re-used for the HBEP, as referenced in the AFC, pg 2-2. Other features referenced, including floor drains, hub drains, sumps, piping and wastewater lift station were not location specific, and could not be referenced in the AFC, but Robert said they would make every attempt at responding to staff's data requests.

Robert was able to confirm that most of the project's engineering drawings are preliminary, and that final engineering drawings will not be available until several months before the start of construction.
