In the Matter of:	**DOCKET NO. 03 AFC-01**
Application for Certification for the Roseville Energy Project	**STATUS REPORT NO. 6**

On August 25 2004 the Siting Committee for the Roseville Energy Park (REP) Application for Certification (AFC) directed the parties to file Status Report Number 6. Roseville Electric (RE) has prepared this sixth Status Report to provide information on the status of the issues relevant to the Committee Schedule.

Air Quality

In accordance with the discussions at the Preliminary Staff Assessment (PSA) Workshop and RE's written comments on the PSA, RE has submitted information relating to the operation of the REP to the Placer County Air Pollution Control District (PCAPCD). The information demonstrates how the REP will be operated in such a matter that no new additional emissions offsets are necessary for the PCAPCD to make the findings that the REP will comply with all applicable District rules in its FDOC. RE additionally provided information relating to its BACT analysis for CO. RE expects the FDOC to be issued within a few days.

Biology

RE applied for a Nationwide Permit from the U.S. Army Corps of Engineers (Corps). After some time, the Corps reviewed the application and required additional information relating to the wetland delineation and the actual location of REP facilities in addition to work that had been performed when the adjacent wastewater treatment plant was constructed. RE met with the Corps and CEC Staff on Friday, August 27. The result of the meeting was a directive for REP to revise its wetland delineation map and resubmit

it to the Corps for verification. Upon verification, the Corps directed RE to refile its application. RE is currently preparing the revised wetland delineation map to provide the additional clarification requested at the Corps meeting.

Visual Resources

RE has disagreed with Staff's plume analysis. RE has obtained Staff's modeling input and output files and is in the process of completing its own plume analysis. RE will file the analysis before the September 8, 2004 scheduled workshop and looks forward to working with Staff towards a resolution.
