HECA Project –
Public Scoping Meeting for EIS

California Energy Commission
DOCKETED
08-AFC-8A
TN # 66248
JUL 16 2012

PUBLIC SCOPING MEETING COMMENT FORM

Must be received on or before July 27, 2012
(Please print clearly)

Questions for the applicant:
1) What is the estimated space currently available in the Elk Hills sequester?
2) What data is the 3m tons of CO2 P.Y. based on? Such a round figure is too easy, is this based on startup quantities or lifetime estimates?
3) Are there required offsets for coal transport?
4) Are there required offsets for NOX, SO2 etc.?
5) Is there a gasification process tech that is not considered by the applicant, other than the G.E. & Mitsubishi refractories? Would this tech use less or more coal in the process?
Thanks!
