RE: Support for NLCAA for Recognition as an ATTCP

Dear Sirs ~

We are in support of NLCAA and Jack Yapp for the Lighting Control Acceptance Test Certification Provider. Our company employees had the pleasure of meeting Mr. Yapp two years ago while enrolled in the CALCTP 50 hour program which he taught and instructed.

Mr. Yapp's broad knowledge and understanding of Title 24 and lighting control systems from basic to advanced is a great asset to the Lighting Control Acceptance Test Provider program; as is his enthusiasm and ability to communicate the state's overall goal of energy efficiency.

In addition, the school is very equipped with realistic and current lighting control applications which allows for real time, hands on scenarios for it's students. More importantly, the school is "unbiased" thereby welcoming anyone who is seeking certification for the betterment of the cause.

Mr. Yapp has also taken his knowledge and contribution to another level by creating a user friendly software package that complies with the Acceptance Testing documentation thus making it a smooth transfer of information for the Acceptance Test Technician and the CEC.

For these reasons and more, we highly recommend the CEC recognize NLCAA as an Acceptance Test Technician provider.

If you wish to discuss this topic further, I may be reached at 310.293.4579.

Sincerely,

Temistocles Caal,
LEED AP BD+C, CLC, MIES
President
