Subject: **HIGHGROVE POWER PLANT PROJECT DATA ADEQUACY RECOMMENDATION (06-AFC-2)**

The staff has completed its data adequacy review of the Highgrove Power Plant Project Application for Certification (AFC) submitted on May 25, 2006. Staff has determined that the AFC does not contain all the information required by California Code of Regulations, Title 20, Section 1704, including Appendix B, for the 12-month AFC process. Twenty-three technical disciplines were reviewed and information is still needed in two areas; air quality and transmission system engineering.

Attachment A contains an overview of whether each technical discipline evaluated is adequate or inadequate. Attachment B contains detailed data adequacy worksheets that describe staff's findings for each information requirement for the 12-month AFC process.

We have not received comments from other agencies. The South Coast Air Quality Management District has indicated that they have not received the Air Permit Application as of June 16, 2006.

At the Energy Commission's business meeting on July 5, 2006, staff will recommend that the Energy Commission not accept the AFC until all the additional information specified in Attachment B is supplied. Pursuant to California Code of Regulations, Title 20, Section 1709 (c), if the Energy Commission accepts staff's recommendation, the Energy Commission may use the attached Data Adequacy worksheets to indicate in writing those parts of the AFC that fail to meet the information requirements and the manner in which it can be made complete.

If you have any questions, please call Robert Worl, staff's Project Manager, at (916) 651-8853.
