

Appendix I
Difference in 24-hour Averaged PM_{2.5} Concentration

This section presents the difference in 24-hour average $PM_{2.5}$ concentration between each DG scenario and the base case.

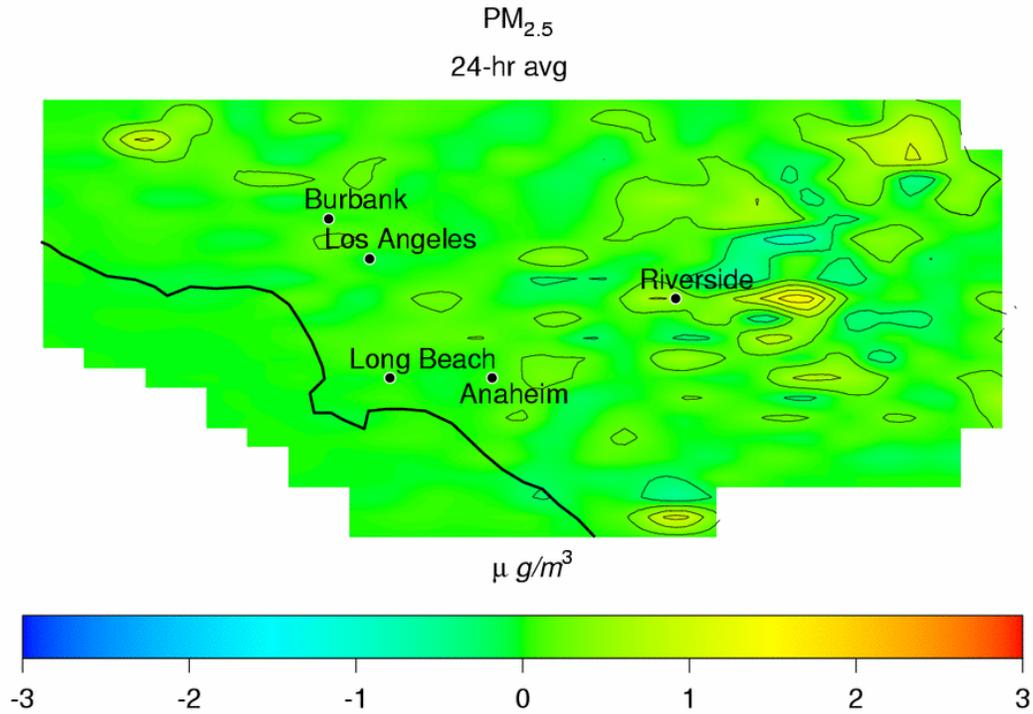

Figure I-1. Difference in 24-hour averaged $PM_{2.5}$ concentration: PW2010

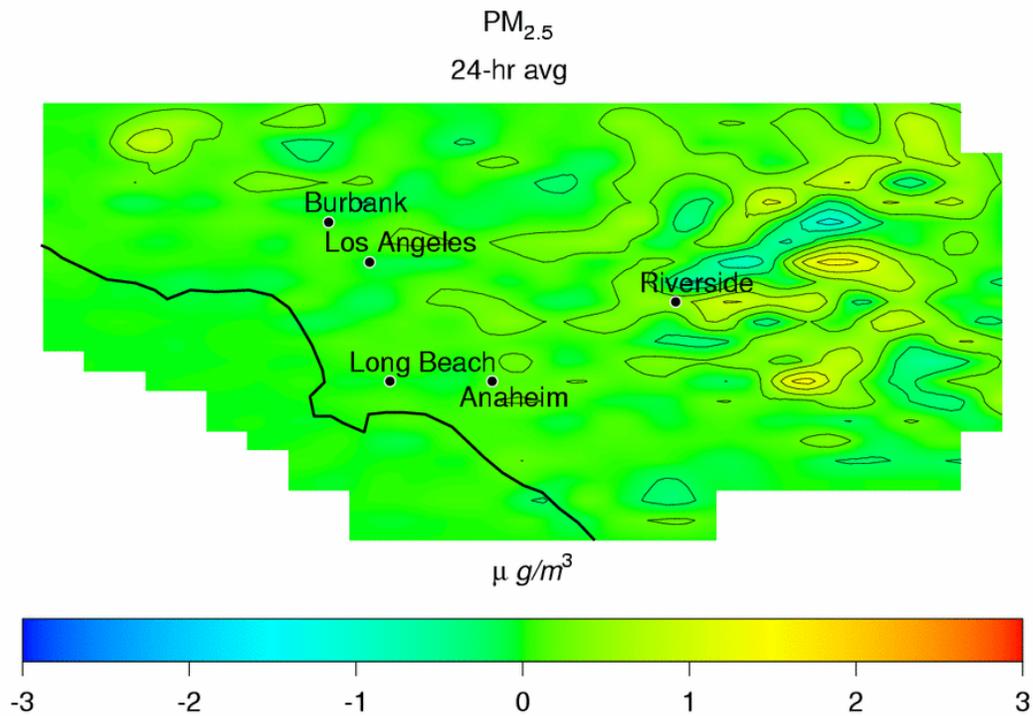

Figure I-2. Difference in 24-hour averaged $PM_{2.5}$ concentration: 2003ES

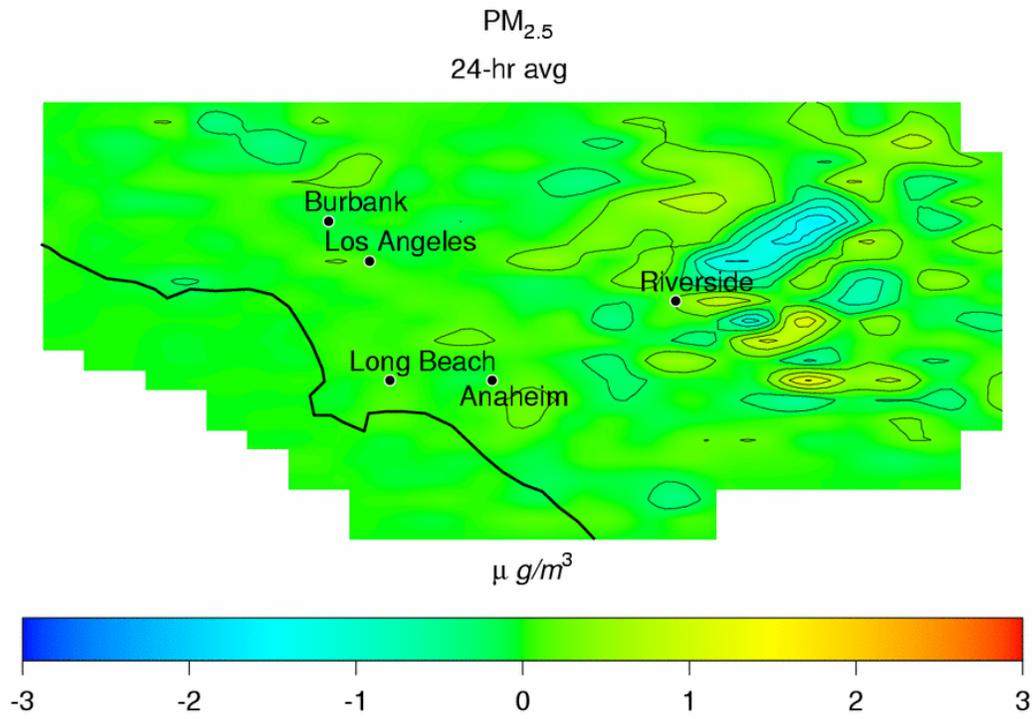

Figure I-3. Difference in 24-hour averaged PM_{2.5} concentration: 2007ES

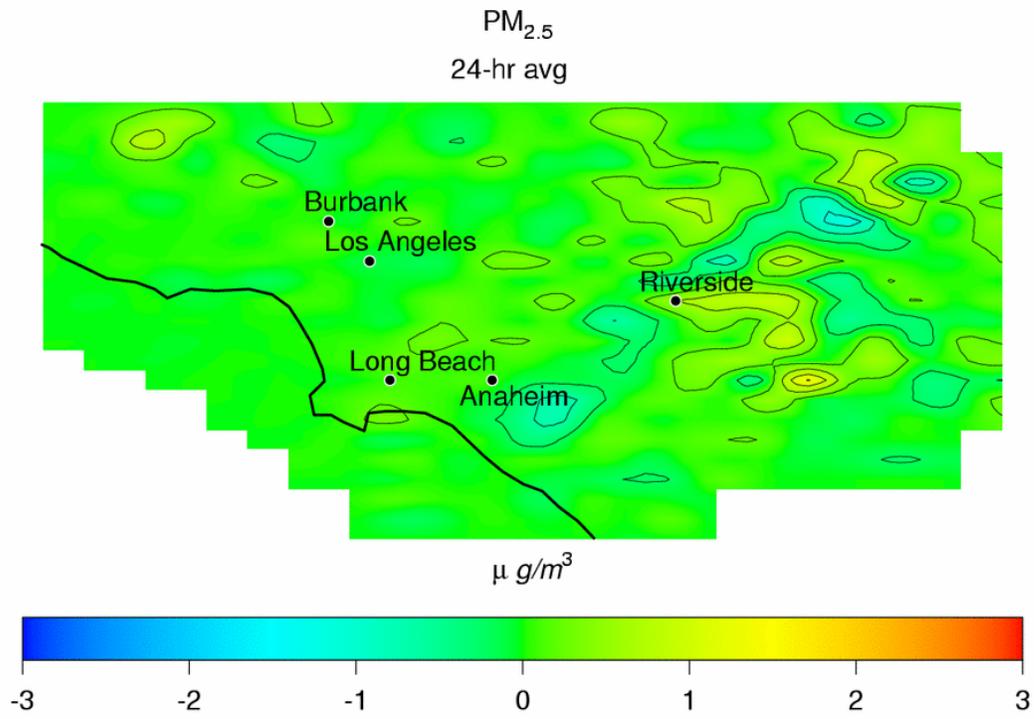

Figure I-4. Difference in 24-hour averaged PM_{2.5} concentration: BAU

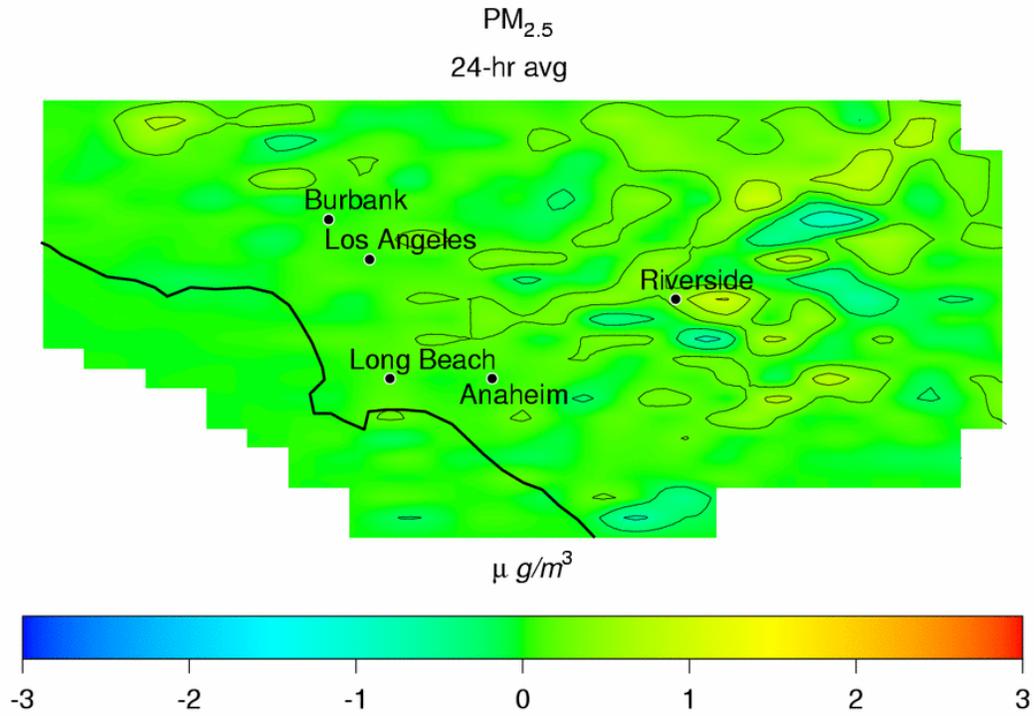

Figure I-5. Difference in 24-hour averaged PM_{2.5} concentration: BAU-par

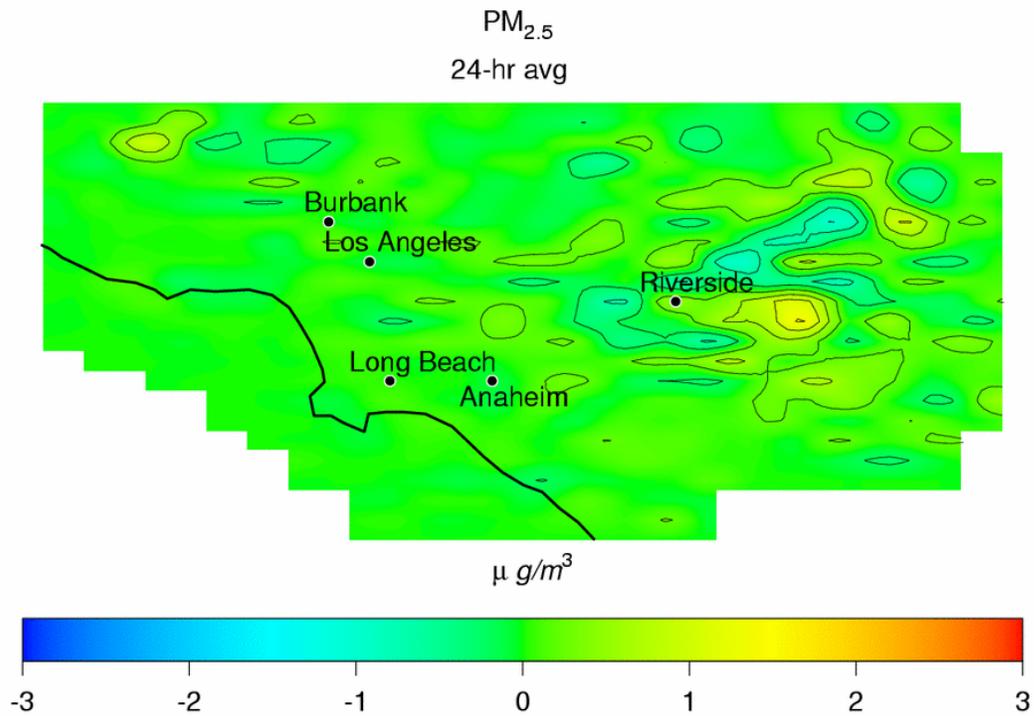

Figure I-6. Difference in 24-hour averaged PM_{2.5} concentration: DGCHP

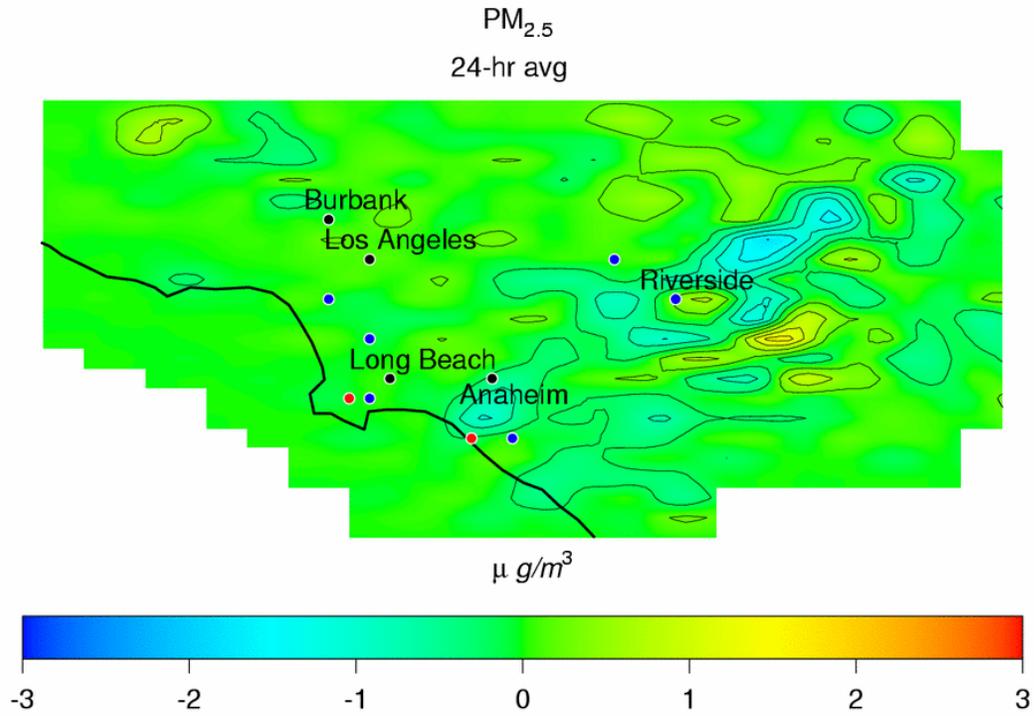

Figure I-7. Difference in 24-hour averaged PM_{2.5} concentration: DGEED

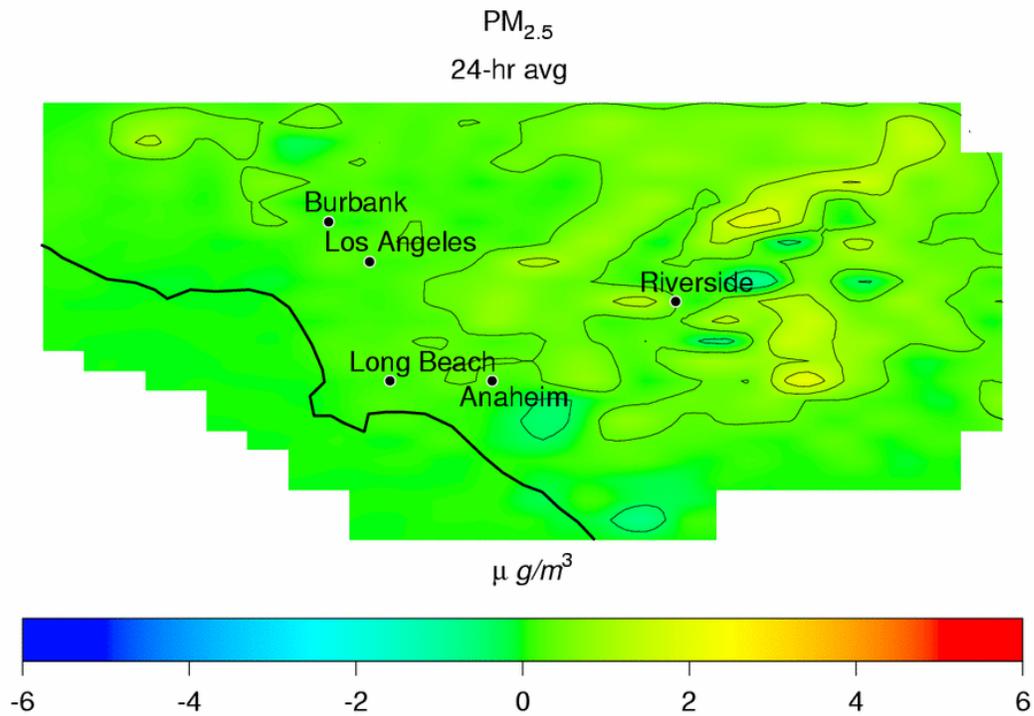

Figure I-8. Difference in 24-hour averaged PM_{2.5} concentration: EHP
