

**Next Steps  
for  
Incremental, Uncommitted Energy  
Efficiency Quantification Sub-Project**

Michael Jaske  
Energy Commission Staff  
February 3, 2010

# Immediate Remaining Steps

- Clarify technical documentation of the results as result of this workshop and comments (due Feb. 5)
- Conduct IEPR workshop on Feb. 17 for policy issues related to the use of these results
- Modify policy aspects of staff report was a result of the IEPR Committee workshop
- Transmit final documentation to CPUC as an energy Commission input into the forthcoming 2010 LTPP proceeding(s)

# Intermediate Next Steps

- Complete current CEC staff training on SESAT and its inputs, and implement for a POU
- Review accomplishments with DFEEQP working group members and set a course of action for the next round of analyses for 2011 IEPR cycle
- Talk with CPUC/ED staff in charge of the next goals update proceeding about “lessons learned” from this effort

# Longer Term Next Steps

- Conceptualize improved linkages between end-use forecasting models and platforms for quantifying impacts of hypothetical energy efficiency program designs
- Assess interactions with other demand-side policy initiatives leading to “managed” demand forecasts
- Develop specific plans for the 2011 IEPR cycle
