Notice of Availability
2009 AB 2021 Progress Report: Achieving Cost-Effective Energy Efficiency For California
Publication No. CEC-200-2010-006
Docket No. 10-IEP-1

The staff report, *2009 AB 2021 Progress Report: Achieving Cost-Effective Energy Efficiency for California*, was prepared in support of the *2010 Integrated Energy Policy Report*. This report documents the progress California's utilities have made toward fulfilling the legislative mandate to first meet their unmet resource needs through all available energy efficiency and demand reduction resources that are cost-effective, reliable, and feasible.

In 2009, an increasing number of publicly owned utilities began to evaluate their energy efficiency programs and report the results to the Energy Commission. This report contains a comprehensive evaluation of the 2009 studies and guidelines to assist in future efficiency program evaluations.

Staff's report is available free from the Energy Commission's website at:

www.energy.ca.gov/2010_energypolicy/documents/index.html

Printed copies are also available for \$10.00. Please send request and check or money order made payable to the California Energy Commission to:
