Background

Senate Bill 1389 (Bowen, Chapter 568, Statutes of 2002) requires the Energy Commission to adopt an integrated energy policy report every two years. The objective of the IEPR is to evaluate market trends and develop energy policies that will “conserve resources, protect the environment, ensure energy reliability, enhance the state's economy, and protect public health and safety.” (Public Resources Code § 25301[a]). The Final *2011 IEPR* has been prepared in response to this direction and is available on the website noted above.

The Final *2011 IEPR* discusses strategies for meeting Governor Jerry Brown's Clean Energy Jobs Plan and other state energy goals that will help build California's Clean Energy Future. The report provides recommendations to ensure reliable, affordable, and environmentally sound supplies of electricity, natural gas, and transportation fuels to meet the needs of the state's economy and growing population. To prepare the report, the Energy Commission conducted 30 public workshops throughout the 2011 IEPR proceeding on a range of issues facing California's electricity, natural gas, and transportation fuel sectors. On December 5, 2011, the Energy Commission released the Draft *2011 IEPR* to solicit public comments. The Final *2011 IEPR* considers all written comments from the stakeholders on the draft report.

Written Comments

The Energy Commission will accept comments on the Final *2011 IEPR* and requests parties to submit comments in writing by **February 1, 2012**, so that comments can be considered prior to the February 8, 2012, Business Meeting.
