Renewable Energy Benefits

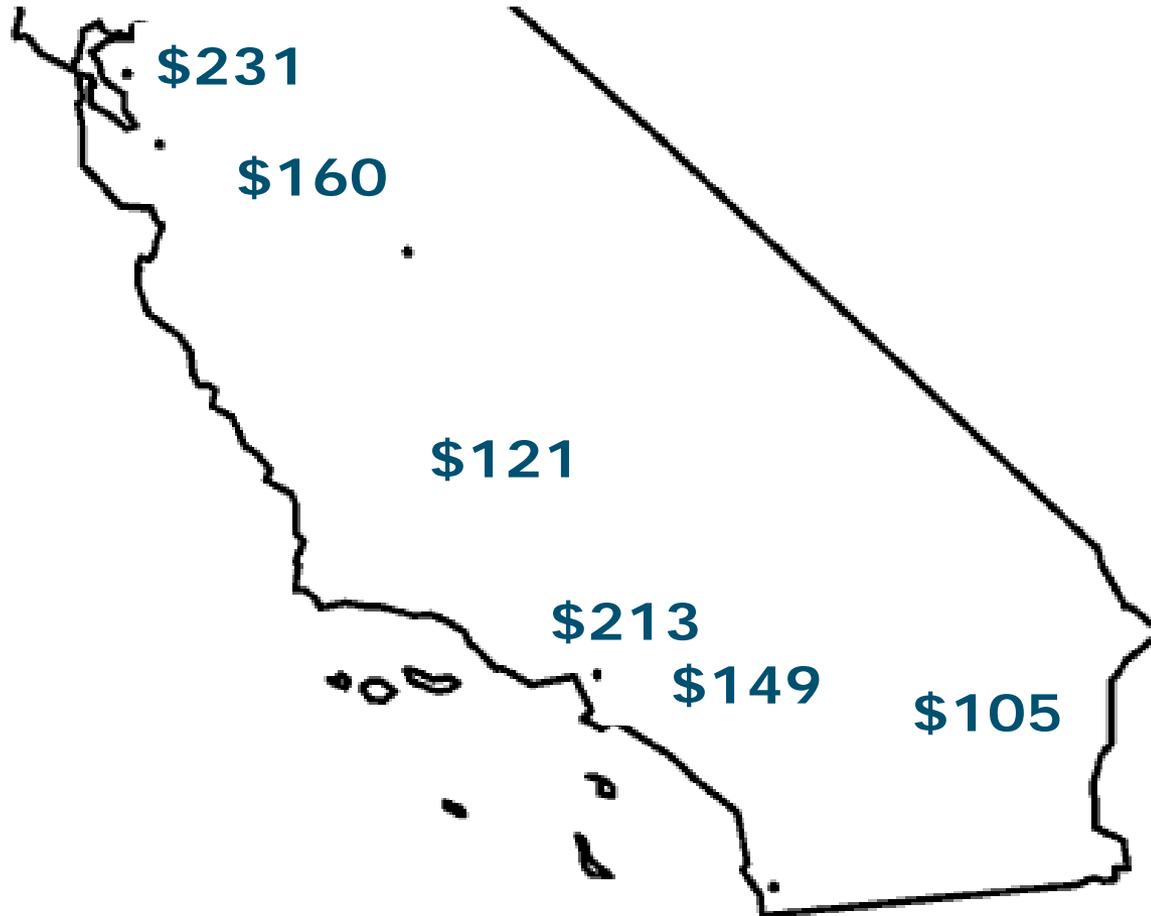

California Energy Commission IEPR Workshop

April 12, 2012

Arne Olson, Partner
Energy and Environmental Economics

Solar PV Costs Vary Dramatically by Location (\$/MWh)

Source: CPUC 33% RPS Calculator, April 2012

Does “Local” Siting Really Lead to Local Benefits?

- + **Ratepayer costs and benefits are experienced utility-wide**
- + **Construction impacts experienced locally**
 - Vehicle trips, noise, dust, etc.
- + **Most economic benefits are temporary**
 - Construction work may be done by outside crews
 - Local tax benefits are real, but renewables may be exempt
- + **Emissions impacts are experienced regionally**
 - Rooftop PV in LA may displace gas plants in Northern California, Oregon or Arizona
