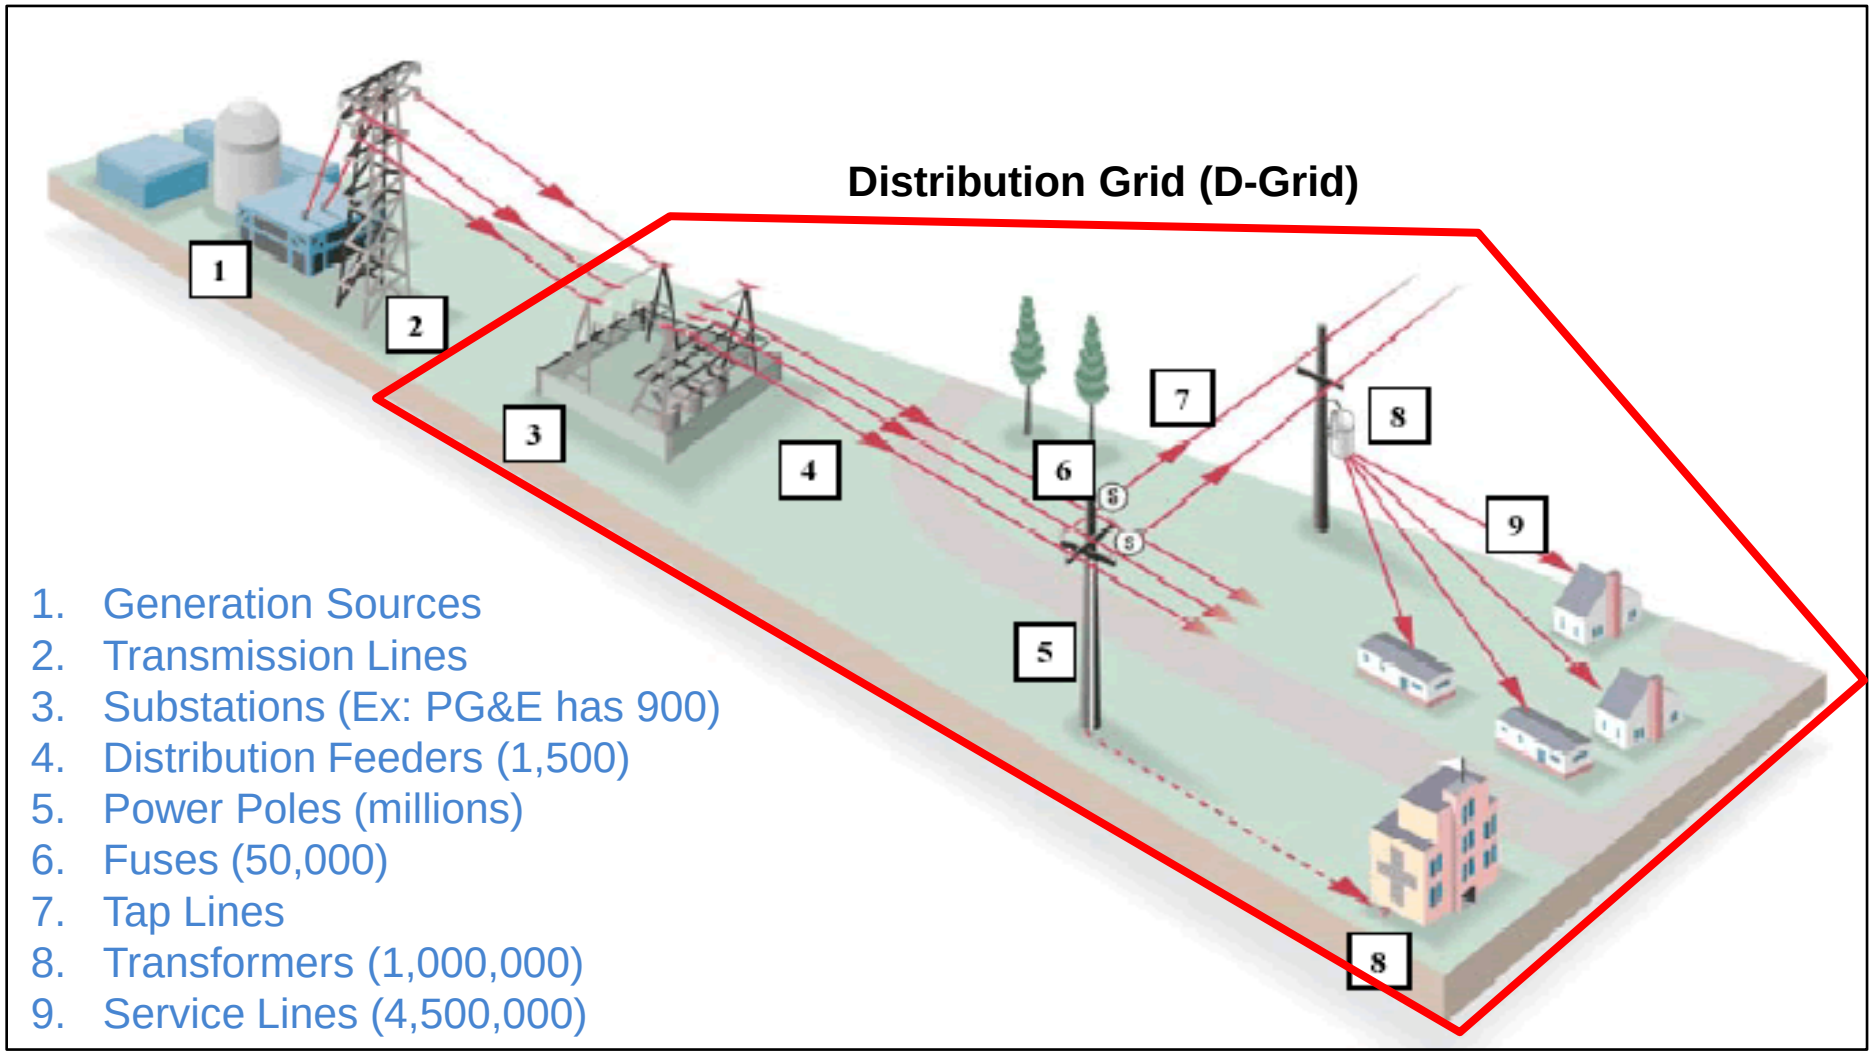
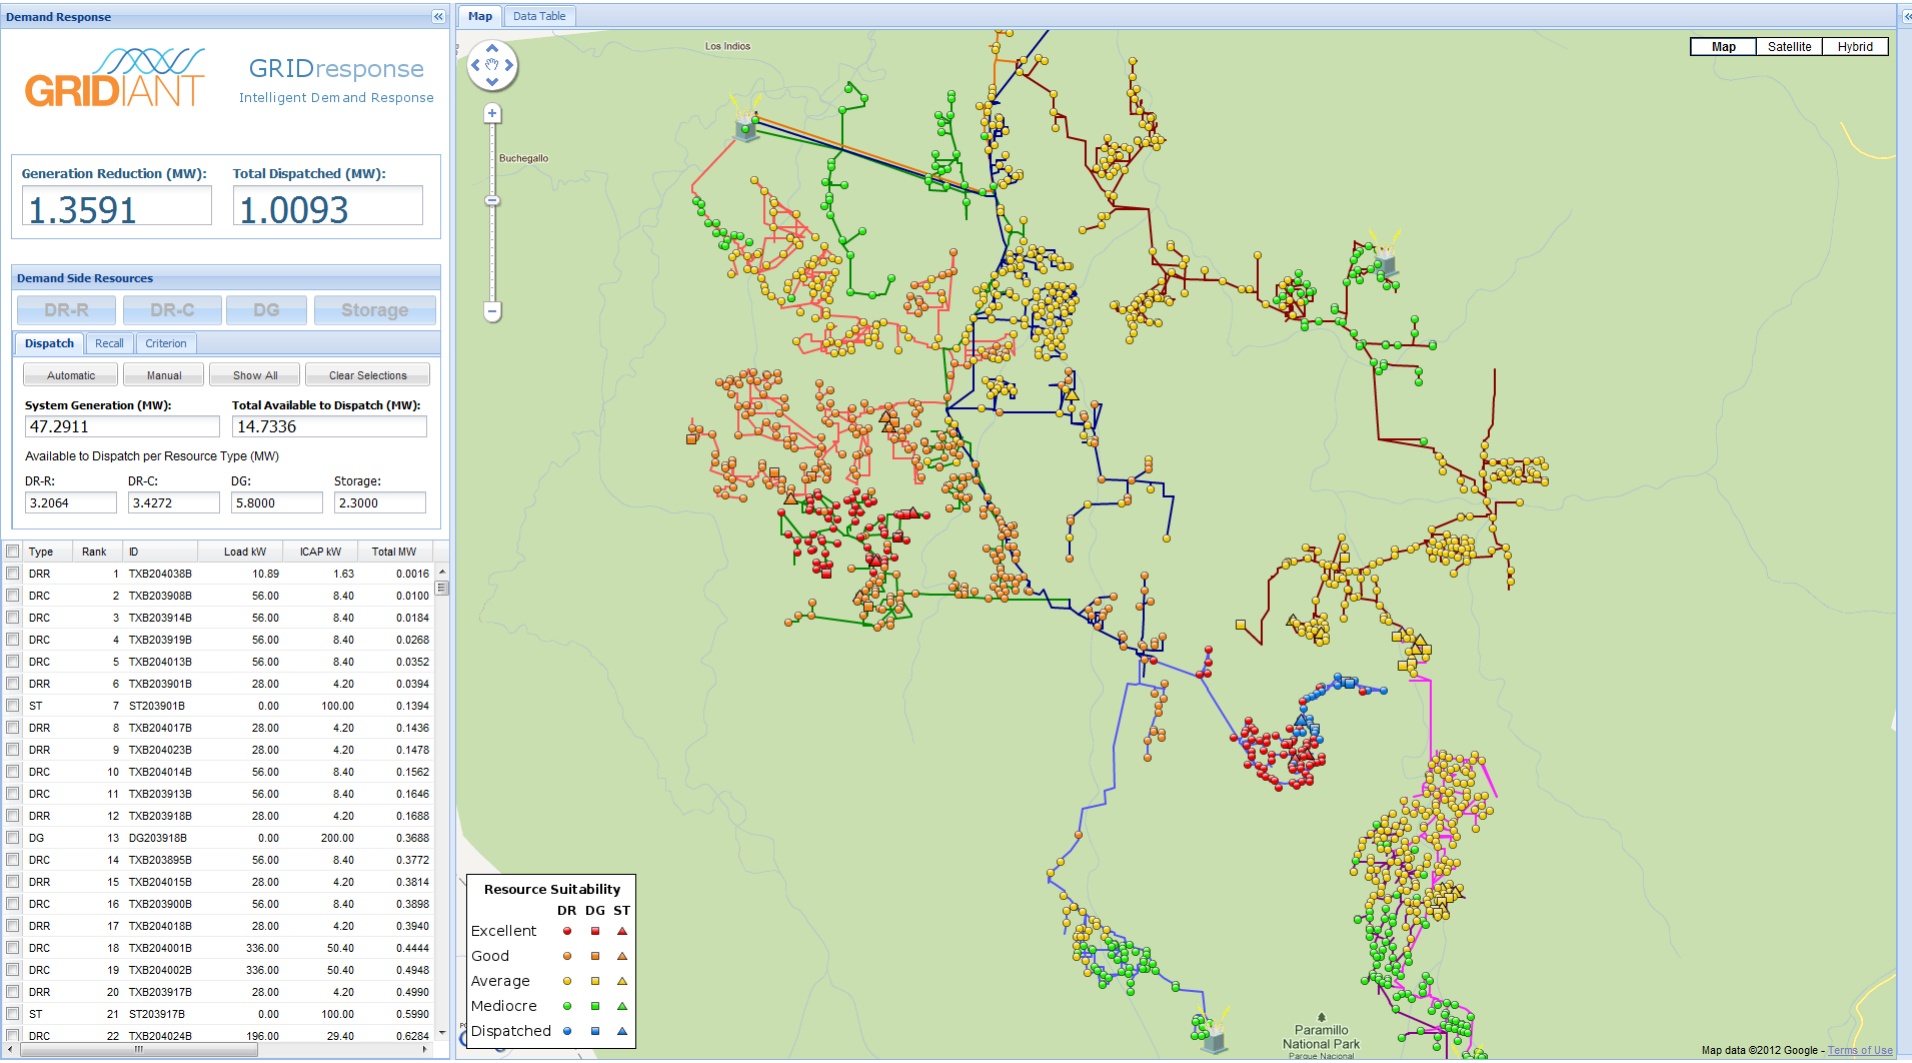
The D-Grid and its Key Components



1. Generation Sources
2. Transmission Lines
3. Substations (Ex: PG&E has 900)
4. Distribution Feeders (1,500)
5. Power Poles (millions)
6. Fuses (50,000)
7. Tap Lines
8. Transformers (1,000,000)
9. Service Lines (4,500,000)

Optimizing DG+IG Siting and Ratepayer Value

CLEAN COALITION



Prioritizing D-Grid Upgrades = Ratepayer Benefits
