CCEF and Job Creation in California

Table 1. Estimate of energy-related job-years created in California over the decade 2011-2020

	Job Factors*	Jobs Input*	Cumulative Jobs 2011-2020 ² (job-years)
Demand-side	1 job-year per \$56,500 to \$39,700	\$20.4 billion	360,700 to 513,350
Renewable Electricity	Unique job factor for each renewable technology (see Table 6)	11,228 MW time constrained scenario; 17,712 MW environmentally constrained scenario	93,765 to 163,555
Transmission Infrastructure	29.44 job-years per mile; 12,500 job-years per \$1 billion	974 miles \$7.5 billion	28,675 to 93,750
Total Job-years created:			483,140 to 770,655

* Explanation of job factors and inputs is provided in the methodology sections.
