## Notice of Lead Commissioner Integrated Energy Policy Report Workshop on Transportation

The California Energy Commission will conduct a workshop to commence the *2014 Integrated Energy Policy Report Update (2014 IEPR Update)* which will be focused on transportation. The workshop will highlight the importance of making forward progress on reducing pollution from the transportation sector and include discussions on the role the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP) can play in helping to achieve this progress. The discussions will be concentrate on the recent passage of Assembly Bill 8 (Perea, Chapter 401, Statutes of 2013) which extends clean transportation investment programs such as the ARFVTP including how investment in clean transportation fits within the state's broader goals for climate, clean air, and energy security and the importance of incentives in helping speed the transition to a cleaner transportation sector.

Commissioner Janea A. Scott and Commissioner Karen Douglas will be in attendance. Commissioner Scott is the Lead Commissioner for the *2014 IEPR Update* and the Lead Commissioner on Transportation. Commissioner Douglas is the Lead Commissioner on Siting. Other commissioners may attend and participate in the workshop. The workshop will be held:

## Background

The Energy Commission supports and develops policies that encourage the inclusion of clean low carbon transportation fuels and vehicle technologies as a means to helping attain California's air quality, climate, and energy goals. Assembly Bill 118 (Núñez, Chapter 750, Statutes of 2007), created the Alternative and Renewable Fuel and Vehicle Technology Program. The statute, subsequently amended by Assembly Bill 109 (Núñez, Chapter 313, Statutes of 2008), authorizes the Energy Commission to develop and deploy alternative and renewable fuel and advanced transportation technologies to help attain the state's climate change policies. Assembly Bill 8 (Perea, Chapter 401, Statutes of 2013) extended the Alternative and Renewable Fuel and Vehicle Technology Program through January 1, 2024, and makes approximately \$100 million available annually to the Energy Commission to support projects that will help bring clean and efficient transportation fuels and technologies to market. By the end of 2023, the Energy Commission will have allocated approximately \$1.5 billion in advanced technology fuels, fueling infrastructure and vehicle technologies.

As required by Senate Bill 1389 (Bowen, Chapter 568, Statutes of 2002), the Energy Commission conducts "assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand and prices." The Energy Commission uses these assessments and forecasts as the analytic foundation for developing energy policies that conserve resources, protect the environment, ensure energy reliability, enhance the state's economy, and protect public health and safety. Developing energy policy recommendations about the most current and pressing energy issues facing the state requires an evaluation of potential trade-offs by an in-depth and integrated analysis which explicitly addresses inter-fuel and inter-market effects (Public Resources Code §25302(b)).

## Public Comment

**Oral Comments.** The IEPR Lead Commissioner will accept oral comments during the workshop. Comments may be limited to three minutes per speaker. Any comments will become part of the public record in this proceeding.

**Written Comments.** Written comments should be submitted to the Dockets Unit by **April 10, 2014**. Written comments will also be accepted at the workshop, however, the Energy Commission may not have time to review them before the conclusion of the workshop. All written comments will become part of the public record of this proceeding. Additionally, written comments may be posted to the Energy Commission's website for this proceeding.

The Energy Commission encourages comments by e-mail. Please include your name and any organization name. Comments should be in a downloadable, searchable format
