

# NEOPERL® Wholesale Price List

## Catalog 3

**NEOPERL®**

flow, stop and go®

# Catalog 3

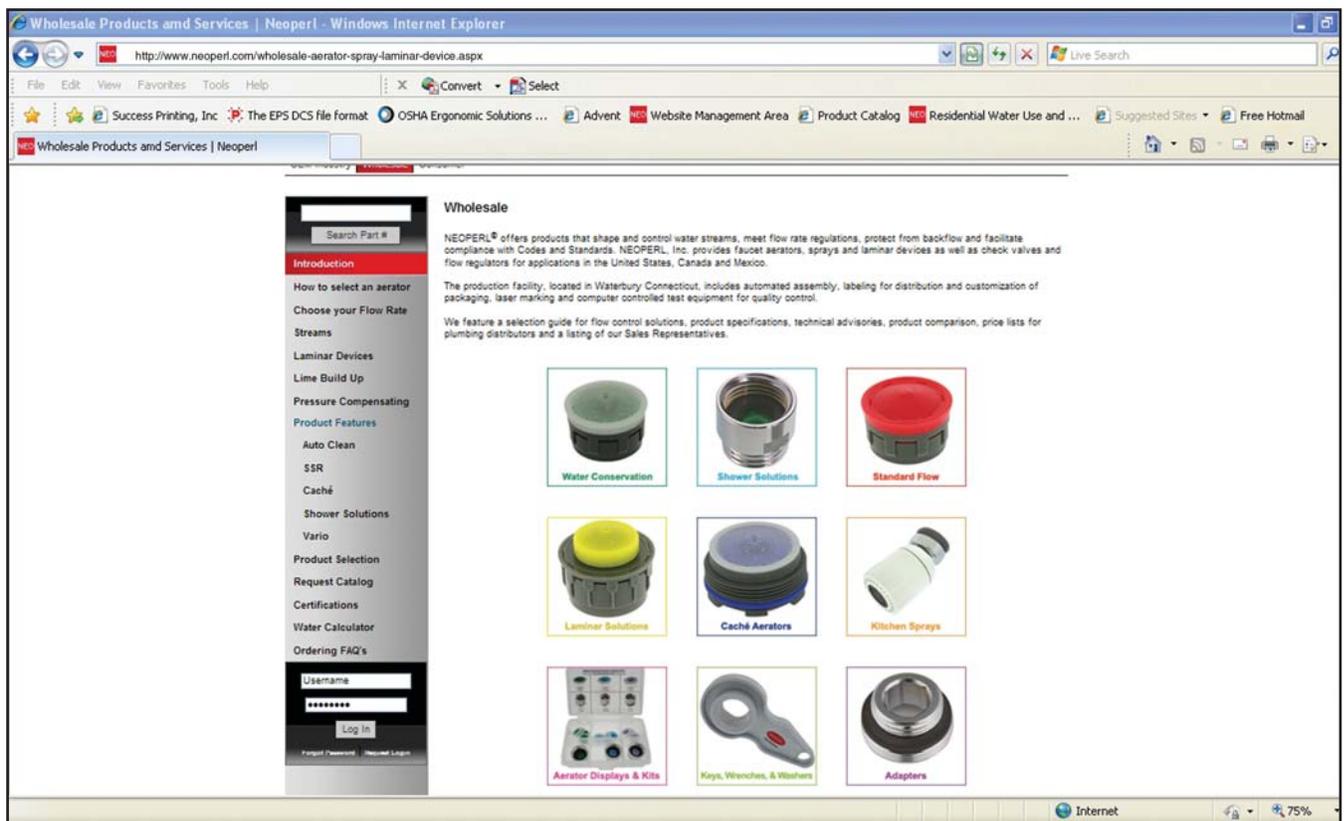

As a leader in faucet attachment manufacturing, NEOPERL® , Inc. strives on developing innovative solutions for faucets in today's market. We have solutions for extreme water conditions, issues related to debris in water, lime buildup or variations in water pressure.

## What's new in NEOPERL® catalog 3?

- New products have been added throughout the catalog. Look for **New** next to them.
- Rep finder
- UPS delivery map

## New redesigned NEOPERL® website!

After much anticipation our website (www.neoperl.com) has been redesigned for easier navigation.

Within the Wholesale area you can now:

- Search by part # or product category/section
- View your pricing online
- Place orders
- Research features (SLC, AC, SSR, PCA, Laminar, etc.)
- View spec sheets
- Look up upcoming events

We are very excited to have a launched our new catalog and website. We hope you find these tools useful when gathering all the necessary information for your customers.

Feel free to contact us, should you have any questions or comments.

*Your Wholesale Team*

# Aerators Selection Easy as 1-2-3

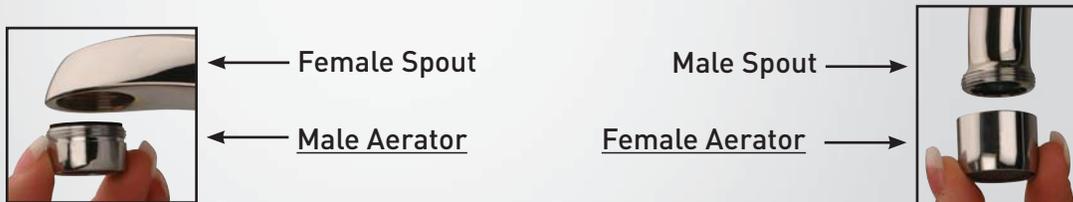

## 1 Determine faucet aerator housing size

### Need to repair the entire aerator or just the insert?

- If your metal aerator housing is in good condition, you can decide to replace the insert only.
- A damaged metal housing requires replacement of the entire unit.

## 2 Determine if you need male or female (if you need a housing)

## 3 Choose stream type & flow rate

# Aerator Problems?

## NEOPERL® has the solution!

**Problem: Water pressure variation**  
**Solution: Pressure compensating aerators**

Regardless of your location (valley, mountains, high rise, or multi housing unit), you may experience water pressure variations. NEOPERL® offers a pressure compensating (PCA®) faucet attachment that maintains a constant and comfortable flow, for use in the kitchen or bathroom (ranging from a low flow to a standard flow).

For additional information, see pages 7 & 63 or visit [www.neoperl.com/wholesale](http://www.neoperl.com/wholesale)

### PCA® Faucet Aerator Working Principles

Position 1

no pressure  
 O-ring is relaxed

Position 2

normal pressure  
 O-ring slightly compressed  
 to allow the correct amount  
 of water to pass through

Position 3

high pressure  
 O-ring is compressed  
 tighter to reduce water  
 flow

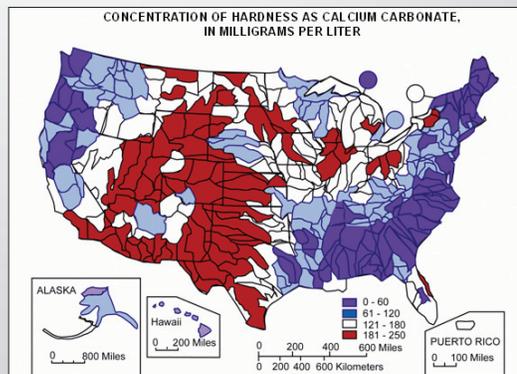

**Problem: Lime Build Up**  
**Solution: SLC® Faucet Aerator**

Over the years NEOPERL® has improved on a common problem... Lime Build up! From the lime resistant Perlator® Honeycomb®, which replaces the wire mesh screens, prone to lime build up, to the Cascade construction that prevents lime. The ultimate solution to lime build up is the easy to clean soft silicone tip available on the SLC® faucet aerator. Simply rub the lime way!

For additional information visit [www.neoperl.com/wholesale](http://www.neoperl.com/wholesale)

Map obtained from <http://water.usgs.gov>

## Problem: Debris/Sediments Solution: Auto Clean Faucet Aerator

Although filtering of sediments in the dome is a better solution than the wire mesh aerator for areas with low debris/sediment in the water, the dome screen can quickly become clogged. In construction sites where the main water system is periodically interrupted for maintenance "flushing", this can become a problem.

The PCA® Perlator® Auto Clean, will accumulate the sediments in the dome screen until the faucet is shut off. The sediments will be flushed within the first few seconds of opening the faucet.

For additional information visit [www.neoperl.com/wholesale](http://www.neoperl.com/wholesale)

### Auto Clean Faucet Aerator Working Principles

- 1 - Faucet on  
- water flows  
- plunger is closed  
- sediments and debris are accumulated on the dome screen

- 2 - Faucet off  
- no water flow  
- plunger is open  
- sediments and debris are accumulated on the dome screen

- 3 - Faucet on  
- water flow starts  
- sediments and debris flush out through the now open orifice with the first flow of water  
- plunger closes again

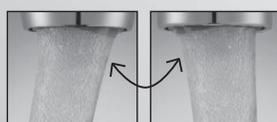

- 4 - Faucet on  
- water flows with fresh and clean water  
- plunger is closed (returns to position 1)

## Problem: Water stream direction Solution: Adjustable stream faucet aerator

Some combinations of sink and faucet are visually pleasing, but not ideal for hand washing. With NEOPERL's SSR faucet aerators, you can easily adjust the stream direction and eliminate splashing from the curvature of the sink.

Swiveling

For additional information visit [www.neoperl.com/wholesale](http://www.neoperl.com/wholesale)

### Problem

### Solution

# Are All Faucet Aerators Equal?

## A Brief Summary of Certifications Applicable to Faucet Aerators

**ANSI/NSF61 - Compatibility with drinking water**  
Evaluates the material toxicity to make sure that the product does not contain potentially harmful materials.

*Did you know?*

*Imported faucets have to go through NSF61 testing but replacement parts do not. To cut cost, imported faucet aerators are not tested for toxicity and are built using materials of uncontrolled origin in unidentified factories in the Far East...*

**ANSI / ASME A112.18.1M - Construction, Performance and Endurance**  
Defines the maximum flow rate for different faucet types, establishes thread specifications and sets standards for the quality and endurance of the plating (surface finish). Also mandates NSF61 certification.

*Did you know?*

*Imports are generally also marked A112.18.1M... only because FTC requires this marking. To cut cost, imported faucet aerators are most often not evaluated by an independent lab and many do not meet the basic flow requirements of the Standard.*

**CSA B125 - Construction, Performance and Endurance**  
Same as ASME A112.181M in Canada (CSA = Canadian Standards Association).

*Did you know?*

*The standards between the U.S. and Canada are harmonized.*

**WaterSense - A water conservation program, similar to Energy Star, sponsored by the U.S. Environmental Protection Agency (EPA).**  
WaterSense labeled faucet aerators use no more than 1.5 gpm (@60 psi), no less than 0.8 gpm (@20 psi) and have completed a third-party certification process that includes laboratory testing to ensure products meet criteria for performance, efficiency and safety.

*Did you know?*

*"If every household in the United States installed WaterSense labeled bathroom sink faucets or faucet aerators, we could save approximately \$600 million in energy costs and more than 60 billion gallons of water annually".*

*- Source: EPA*

## No Lead Product Solutions

### Compliance with California AB 1953 and Vermont S-152.

NEOPERL's plant and products are listed with NSF International to ANSI/NSF Standard 61, Section 9: Drinking Water System Components - Health Effects.

With the exception of Spring Flo®, all NEOPERL faucet aerators also fully comply with the new lead reduction legislations and will be gradually added to NEOPERL's NSF61 annex G listing. Compliance with annex G ensures compliance with the new lead reduction laws.

*By January 4, 2014, all faucets and faucet replacement parts will need to be in compliance with the new Reduction of Lead in Drinking Water Act [S3874, 111th Congress, 2009-2010].*

# Section 1 - Water Conservation

## A simple way to save water!

Water is a precious resource and upgrading your faucet aerator is essential in conserving water and energy, while saving you money.

Compared to the standard 2.2 gpm aerator, the **1.5 gpm** models provide a flow rate reduction up to 30%. These models are available in a laminar (non-aerated) stream, ideal for health care facilities, as well as an aerated stream.

The **0.5 gpm** spray models provide a flow rate reduction up to 75% as compared to the 2.2 gpm device and transform the common single stream into a wide spray, ideal for hand washing stations.

NEOPERL® has included in this section the brand new PCA Supply Line adapters. Whenever the faucet aerator cannot be replaced to retrofit the faucet to a water saving flow rate, a PCA Supply line adapter is the perfect solution. Simply install the adapter under the sink between the supply line and the faucet. The faucet will have the flow rate set by the adapter and is now participating in your efforts to save water.

## USGBC - LEED® : Looking at buildings first

- The intent is to maximize water efficiency within buildings to reduce the burden on municipal water supply and wastewater systems.
- Points are awarded for reaching savings of 20%, 30% or 40% below the water use baseline for the building.
- Building products (including plumbing products) can help gain LEED points toward building certification.

	Standard product (EPAct '92)	Usual target
Toilets	1.6 gpf	1.28 gpf
Showers	2.50 gpm	≤ 2.00 gpm
Faucets & aerators	2.20 gpm	1.50 gpm, 1.0 gpm, 0.5 gpm & 0.35 gpm

LEED is a trademark of the USGBC, for more details visit [www.usgbc.org](http://www.usgbc.org).

### Did you know?

Only buildings (not products) can receive certification by LEED® and for the best performing ones, the prestigious rating of Silver, Gold or Platinum.

## EPA - WaterSense: Looking at plumbing products

- The Environment Protection Agency created the WaterSense program to encourage the development of safe (non-toxic) water efficient plumbing products.
- WaterSense products use significantly less water but perform as well or better than conventional ones.
- Products that meet EPA's criteria receive the blue and green WaterSense seal.

### Toilets

WaterSense lowers the maximum flow rate from 1.6 gallons (EPAct'92) to 1.28 gallons per flush (a 20% reduction). The new toilets are called HET (High Efficiency Toilet).

### Lavatory faucets (and faucet aerators)

WaterSense lowers the maximum flow rate from 2.2 gpm (EPAct'92) to 1.5 gallons per minute at 60 psi (a 30% reduction) and sets a minimum flow rate of 0.8 gpm at 20 psi.

### Shower heads and shower handles

The EPA has expanded its WaterSense product labeling program to include showerheads effective February 9, 2010.

This specified flow must be equal to or less than 2.0 gallons per minute (gpm) Select OEMs have already succeeded in meeting the performance requirements in these flow rates: 2.0 GPM, 1.75 GPM and 1.5 GPM.

### Did you know?

EPA launched Energy Star in 1992 to promote energy efficiency. In 2007, approximately 2.5 billion products sold met Energy Star requirements.

<b>30 0290 8</b>		6	Tub filler, Male M28 x 1 chrome	<b>\$25.05</b>

- Gray dome
- Full flow
- Aerated stream

## Section 3 - Standard Flow

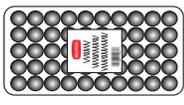

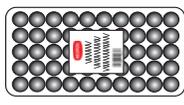

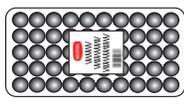

### Does your faucet comply with the legal flow rate requirements?

The Energy Policy Act of 1992 (EPACT '92) created the Energy Conservation Program for Consumer Products and prompted standards for plumbing products (ASME A112.18.1M and CSA B125) to be included into the Code of Federal Regulation (CFR), therefore becoming Federal Law.

Under Federal Law, all kitchen and bathroom faucets are limited to a maximum flow of 2.2 gallons per minute (gpm) at a pressure of 60 psi, and showerheads are limited to a maximum of 2.5 gpm at 80 psi.

# Section 4 - Laminar Solutions and Antimicrobial

## Laminar devices: A better choice for hospital environments.

To produce an aerated stream, white and soft to the touch, air and water are mixed in the faucet aerator's mixing chamber.

While drawing air from the room around the faucet is no problem in residential and commercial applications, it can be a concern in healthcare institutions (hospital, senior care, medical labs). The room air can contain harmful bacteria that are best kept out of the drinking water and the fine droplets produced by the aerator add to the risk of contamination by inhalation.

An increasing number of hospitals (including the Veterans Health Administration) now recommend using non-aerated devices referred to as "Laminar" and easily recognized by their crystal clear stream.

# CARE+GUARD®

with built-in  
**agion®**  
Nature's antimicrobial

## Unique hygienic features:

- Built-in Agion® antimicrobial product protection. This incorporates the natural protection of silver, preventing the growth of a broad range of microorganisms.

## Additional features:

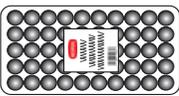

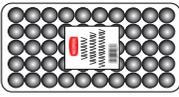

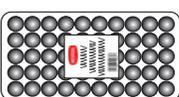

- Water and energy saving (PCA® 0.35gpm, PCA® 0.5gpm and 1.5gpm).
- Virtually unbreakable single piece insert to ensure a longer useable life.
- Splash free crystal clear or spray stream (non-aerated).
- Unique screen-less 100% plastic construction to prevent lime build up.

PCA® Careguard® 0.35 and 0.5 sprays are new additions to the Careguard® product family. They feature a pressure compensating ability which maintains constant low flow of water, while its spray pattern minimizes splashing. The spray pattern consists of a ring of mini laminar (non-aerated) streams.

**Careguard®, recommended for health care facilities!**

## Section 5 - *Caché*<sup>®</sup> Aerators

### The Hidden Aerator

The Caché<sup>®</sup> aerator threads directly (and disappears) into the faucet spout, making it vandal proof by design. Removal and installation is easy with the Caché<sup>®</sup> key (found in section 9). Caché<sup>®</sup> aerators have been used by OEMs since 2006.

Simply use the Caché<sup>®</sup> key to easily remove and replace the Caché<sup>®</sup> aerator

## Section 6 - Kitchen Swivel Sprays

### Kitchen Swivels

Most kitchen swivel aerators can switch from aerated to spray stream by pulling down and pushing on the the aerator body. The Neoperl® Vario® easily switches from aerated to spray with a simple twist.

- Converts to 2.2 gpm stream when pulled down  
Will Default back to 0.5 gpm when faucet is shut off

## Section 7 - Counter Display Deals & Kits

### Deals

Ideal for small counter areas or to display several kind of aerators and perfect for wholesalers and contractors concentrating on commercial applications.

### Kits

Kits were designed to make ordering the right replacement parts easy. The adapter kits solve almost any thread issue found in the field. The washer kit has an assortment of regular and junior size washers, perfect to replace that missing washer on the go. The Shower Solution Kit features 2 different products in 3 different flow rates for shower retrofit and the Water Saving Aerator kit contains a wide selection of NEOPERL® Water Saving products.

# Section 8 - Keys, Wrenches & Washers

### Washers

Due to additives, rubber washers can degrade over time, resulting in water leaks where the aerator connects to the spout. A new washer will create a perfect seal. Washers are available for all sizes. All Neoperl's washers are AB 1953 compliant and Vermont S-152.

### Service Keys and Wrenches

Suitable & easy installation without damaging the chrome finish. NEOPERL® offers service keys for all types of housings (including vandal proof housings) as well as keys for CACHE® aerators.

- Wrenches \_\_\_\_\_ p. 154
- Keys \_\_\_\_\_ p. 155
- Washers \_\_\_\_\_ p. 156

## Section 9 - *Faucet Adapters, Couplers & Fittings*

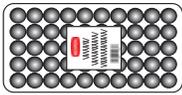

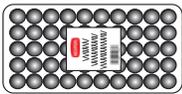

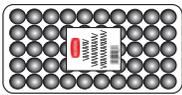

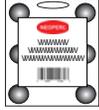

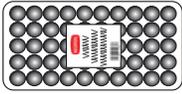

### **Faucet Adaptors**

Faucet adaptors will generally allow you to adapt aerator housings to various thread sizes. NEOPERL® offers a large range of high quality faucet adaptors connecting to almost every metric or inch threads. With its all brass material and first class chromeplating, the range of products is in a league of its own.

Pay with a credit card: Visa, Mastercard, American Express, and Discover. Credit card payments can be taken over the phone or by fax.

# TERMS AND CONDITIONS OF SALE

## 1. ACCEPTANCE

The Acknowledgment/Acceptance of any Order (or any quotation) is given by Neoperl, Inc. ("NEOPERL") subject to the conditions stated below. Purchase orders are not binding until accepted in writing by NEOPERL at Waterbury, Connecticut, U.S.A. Commercial terms are subject to INCOTERMS 1990. Your order when shipped by NEOPERL, shall complete the contract between us. Any inconsistent provisions of your order shall not apply.

## 2. PRICES

Prices quoted are in US dollars exclusive of all taxes and all costs of transportation. Prices are based on current costs and therefore subject to change without notice. All such taxes and costs shall be invoiced to and paid by Buyer.

## 3. TERMS OF PAYMENT AND INTEREST

Terms of payment are net cash thirty (30) days, unless otherwise specified. NEOPERL may impose a monthly service charge of one and one-half percent (1 1/2%) on invoices unpaid after thirty (30) days. Any delivery not in dispute shall be paid for regardless of other controversies relating to other delivered or undelivered goods.

## 4. INSPECTION AND RETURN OF MATERIAL

Buyer shall, at its own expense, inspect upon arrival all products shipped to the delivery point. All claims for damages, errors or shortages of the products shall be delivered to NEOPERL in writing within ten (10) days after such arrival. Any claims will be subject to inspection by NEOPERL. Failure to notify NEOPERL within the specified period shall constitute acceptance of all products. If NEOPERL determines the claim to be valid, NEOPERL's sole liability will be to replace defective products within a reasonable time. Buyer may not return products shipped by NEOPERL without a written authorization.

## 5. CANCELLATIONS AND MODIFICATIONS

Orders accepted by NEOPERL are not subject to cancellation by Buyer, except with NEOPERL's written consent and upon terms which compensate NEOPERL for any loss or damage arising out of said cancellation. If it appears that Buyer will be unable to meet its payment obligations under the contract, NEOPERL may cancel the contract, demand cash payments, or obtain adequate assurances from the Buyer that such timely payment will be made. Modifications, additions, cancellations or suspensions of any order resulting from NEOPERL's quotation, or any acceptance of a purchase order, shall not be effective or binding upon NEOPERL unless evidenced in writing on the face of the order or in a separate writing, signed by an authorized manager of both the Buyer and NEOPERL, expressly stating the terms modified and the nature of the modification.

## 6. SHIPMENT & RISK

All orders are freight and insurance prepaid by Buyer. Method of shipment is at NEOPERL's discretion, unless Buyer specifies otherwise. All shipments are incurred at Buyer's expense and risk. Identification of goods to

the contract shall occur, and title shall pass, upon receipt of the shipment by the carrier. NEOPERL reserves the right to deliver goods in installments. NEOPERL will not be liable for damages of any kind due to failure to meet delivery date.

## 7. LIMITED WARRANTY

NEOPERL GIVES NO WARRANTY AS TO MERCHANTABILITY OR AS TO FITNESS FOR ANY PURPOSE. The sole and exclusive warranty provided herein is that the goods sold are warranted to be free from defects in material or workmanship as established by NEOPERL's standards of acceptable quality. This express warranty is in lieu of all other warranties, express or implied. All claims by Buyer for defective goods shall be governed by Section 4 above.

## 8. LIMITATION OF LIABILITY

UNDER NO CIRCUMSTANCES SHALL NEOPERL BE LIABLE TO BUYER OR ANY OTHER PERSON FOR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSSES OR EXPENSES ARISING FROM THIS CONTRACT OR ITS PERFORMANCE OR IN CONNECTION WITH THE USE OF, OR INABILITY TO USE THE GOODS FOR ANY PURPOSE WHATSOEVER OR FOR INJURY TO PERSON OR DAMAGE TO OR LOSS OF PROPERTY OR VALUE CAUSED BY ANY OF THE GOODS.

## 9. LIMITATION OF ACTIONS

No action regardless of form arising out of any contract with the Buyer may be commenced more than one (1) year after the cause of action has accrued except an action for nonpayment. Buyer shall reimburse NEOPERL for any attorney's fees and other legal expenses incurred in enforcing or defending its rights under any contract arising from its quotation or an acceptance of purchase order.

## 10. GOVERNING LAW

Any contract resulting from NEOPERL's quotation, or acceptance of a purchase order, and all obligations of the parties shall be governed by the laws of the State of Connecticut, including provisions of the Uniform Commercial Code as adopted by the State of Connecticut. Buyer submits to exclusive jurisdiction of the state and federal courts located in Connecticut.

THE ABOVE TERMS AND CONDITIONS DO NOT APPLY TO ORIGINAL EQUIPMENT MANUFACTURERS (OEM), GOVERNMENT ENTITIES OR EXPORT SALES OR PURCHASES MADE IN THE USA FOR EXPORT PURPOSES. ANY SALES UNDER THESE TERMS AND CONDITIONS SHALL BE FOR DOMESTIC SALES AND USE ONLY. NO GOODS ACQUIRED THEREBY MAY BE RESHIPED OR RESOLD OVERSEAS. PLEASE CONTACT OEM REPRESENTATIVE FOR FURTHER DETAILS. THE PRECEDING SUPERSEDES ANY PREVIOUSLY PROVIDED TERMS AND CONDITIONS. THE ABOVE TERMS AND CONDITIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

### Catalog errors

We strive to provide an error free price list. However, if pricing errors are found, they will be corrected in our database immediately and the corrected price will apply. We will inform you if your order contains incorrect prices.

## Who is NEOPERL® ?

Collectively, the NEOPERL® Group is the world leader in design, manufacturing and distribution of faucet aerators, check valve cartridges and flow regulating inserts. Based in Waterbury, CT, NEOPERL® is one of the largest manufacturing sites of the NEOPERL® Group. The Waterbury production facility includes automated assembly, laser marking and computer controlled test equipment for quality control.

Founded in 1928, incorporated in 1944 and for many years a key supplier to the North American faucet industry, Waterbury Pressed Metal, Inc. (WPM) joined the NEOPERL® Group in 1987. NEOPERL moved in 1995 to its current modern facility.

NEOPERL's® plant is certified to ISO 9001-2000 and registered with NSF International, Underwriters Laboratories, Inc. (UL) and the Canadian Standards Association (CSA). NEOPERL® serves Original Equipment Manufacturers (OEM) from various industries in North America as well as Wholesalers and Distributors.

NEOPERL® offers products that shape and control water streams, meet flow rate regulations, protect from backflow and facilitate compliance with Codes and Standards. NEOPERL® designs and manufactures innovative solutions with applications that include plumbing products and in particular faucets and showerheads.
