

Memorandum

To: Melissa Jones
Executive Director

Date : August 2, 2010

Telephone: CALNET (654) 3888

From : **California Energy Commission**
1516 Ninth Street
Sacramento CA 95814-5512

Subject: RECOMMENDATION TO APPROVE A \$5,000,000.00 LOAN WITH THE AMERICAN RECOVERY AND REINVESTMENT ACT (ARRA) FUNDS TO CaliSolar, Inc. THROUGH THE CLEAN ENERGY BUSINESS FINANCING PROGRAM TO BE CONSIDERED AT THE AUGUST 25, 2010 BUSINESS MEETING

Summary of Item

CaliSolar, Inc. submitted an application through the CEBFP. Staff recommends funding CaliSolar, Inc. \$5,000,000.00 for the purchase of fixed-asset manufacturing equipment and eligible installation costs at their manufacturing facility in Sunnyvale, CA.

Justification for Action Requested

Staff reviewed 44 applications for funding through the CEBFP. The four program areas evaluated included job creation/retention, energy saved, leveraged financing, and an economic adjustment for manufacturing job loss. Applications were then submitted to the financial development corporations (FDCs) through the Business, Transportation, and Housing Agency (BTH) where they underwent rigorous business credit analysis. CEBFP awardee's that scored high in these categories were deemed eligible for funding depending on CEBFP loan capacity available.

CaliSolar's application was ranked number 1 with a final score of 82. The project will expand capacity production from 60 megawatts (MW) annually to 155 MW annually by December 2011. The project will create and/or retain an estimated 181 full-time equivalent jobs. The estimated annual production of solar cells at the facility using CEBFP funding will offset 81,131 tons of carbon dioxide (CO₂) per year.

The total project cost is \$25,716,002.00, of which CaliSolar, Inc. will be providing \$20,716,002.00 in leveraged financing. Upon completion of installation, the loan will be repaid in 84 monthly payments.

Staff recommends approval of CEBFP funding in the amount of \$5,000,000.00.

Project Manager

Larry Rillera, Special Projects Office

Oral Presentation

Staff will be prepared to discuss this recommendation and to respond to questions at the Business Meeting.

Business Meeting Participants

Larry Rillera, Special Projects Office
Marcia Smith, Special Projects Office
Jacob Orenberg, Special Projects Office
Michael Doughton, Legal

Commission Action Requested

Approve the CEBFP loan and authorize the Executive Director to execute the loan documents.

PAT PEREZ, Deputy Director
FUELS AND TRANSPORTATION DIVISION

Pros:

- Will create an estimated 181 full-time equivalent jobs, costing \$27,624.31 per job, enabling California and the United States to meet the goals of the American Recovery and Reinvestment Act.
- Will grow in-state clean energy manufacturing, feeding into other Energy Commission programs such as the New Solar Homes Partnership.
- Annual production will produce an estimated 235,161,150 kWh per year of renewable energy, promoting the Energy Commission's Loading Order.
- Annual production will offset carbon dioxide emissions by an estimated 81,131 tons per year, enabling California to meet the goals of AB 32

Cons:

- None

What Happens Next: Staff will conduct kick-off meeting at CaliSolar Inc. manufacturing facility. Elements will include site verification, review ARRA reporting procedures, and assess field, business, and financing conditions.
