Re: Calisolar Facility at 985 Almanor Avenue – CEQA Determination

Dear Mr. Angelo,

The City of Sunnyvale has determined that the proposed solar manufacturing facility (CaliSolar Inc.) is permitted by right at the above noted location. The facility is located on a property within the M-S Zoning District which allows such manufacturing and research & development uses as matter of right, provided that specific floor area thresholds are met (Sunnyvale Municipal Code 19.22.030). A conditional use permit is not required. Staff has reviewed and approved the planned building improvements and modifications through the applicable administrative permit processes. The project is considered Categorical Exempt under Class 1 (Section 15301), of the California Environmental Quality Act (CEQA), which applies to existing facilities. The project involves minor interior and exterior alterations and is not considered an expansion of an existing use.

If you have questions or would like more information, you may contact me at via email or at the number below.

Sincerely,

A handwritten signature in black ink, appearing to read "R. M. Kuchenig", is written over a horizontal line.
