

## SCOPE OF WORK/OBJECTIVES

Project Title: Solar Power, Inc. Photovoltaic Panel Manufacturing Facility  
Project Address: 4242 Forcum Avenue  
McClellan, CA 95652  
Solicitation Number: DE-FOA-0000052

Solar Power, Inc will be using \$5,000,000.00 of federal ARRA-SEP funds awarded from the California Energy Commission to purchase the following equipment:

- PV Cell Sorter
- Tabbing & Stringing Machine
- Layup & Bussing Machine
- Lamination Machine

The \$5,000,000.00 in funding is part of a larger \$19,917,000.00 project, with the remainder paid for with leverage funding by other sources, to establish a solar photovoltaic panel manufacturing plant with a 50 MW annual capacity.

According to the Sacramento County Planning and Community Development Department, the manufacturing plant will be consistent with the McClellan Special Planning Area Zoning. Solar Power, Inc. will not be expanding the building footprint but will be adding a new entry feature and a depressed truck dock well. The project will require county building and planning permits for new building improvements which, according to the application, were obtained in July 2010. Solar Power, Inc. has not specified that there will be any significant changes or impacts to waste stream emissions.
