

IMPERIAL VALLEY SOLAR PROJECT

Consideration and possible adoption of the Committee's Presiding Member's Proposed Decision on the **IMPERIAL VALLEY SOLAR PROJECT** (IVSP) (Docket No. 08-AFC-5), and Errata. The Committee issued its Presiding Member's Proposed Decision (PMPD) on August 26, 2010.

The IVSP is a concentrated solar thermal power plant facility approximately 14 miles west of El Centro, in Imperial County. The proposed project would utilize SunCatcher technology with a generating capacity of approximately 750 megawatts (MW) to be built in two phases. The PMPD contains the Committee's rationale in determining that the proposed project will, as mitigated, have no significant impacts on the environment and will comply with all applicable laws, ordinances, regulations, and standards (LORS).
