

CITY OF BLYTHE: Possible approval of Amendment 1 to Agreement CBG-09-110 with the City of Blythe which provided funding for interior lighting, occupancy sensors, and LED exit sign retrofits within various city-owned facilities. This amendment requests a scope of work revision to allow the City's subcontractor to both purchase and install the specified equipment. In addition, a budget revision is requested to reallocate funds among various budget categories to allow the City's subcontractor to purchase the equipment and to reflect the overall expenses of the project. There is no change to either the efficiency measures being retrofitted or in the total amount of the agreement.
