Subject: New Title 24 Implementation

Gary-

I wanted to respectfully request that you vote to delay the implementation of Title 24 until minimally July 2014 so the industry can better prepare ourselves with the new requirements.

I believe that the standards will have long term benefit, however I believe we will have some significant issues on the hand if manufacturers are not ready. Perhaps there could be a non-mandatory provision position and some incremental steps to the new standards.

Thank you for your consideration
