Subject: Vote to delay implementation of Title 24, at least until July 2014

Dear Gary:

I hope that this note finds you doing well.

As an active lighting contractor in the State of California, we appreciate your dedicated service to designing policy that influences the most reasonable and prudent policies to help the state in energy efficiency, especially in connection with the very complex impacts of Title 24.

We would be grateful if you would consider a vote to delay of the implementation of the new Title 24 standards until July 2014, at a minimum.

Thank you for this consideration that will have a dramatic impact on our industry and the jobs of our employees as we transition to tighter standards for Title 24.

Respectfully yours,
Steve
