(Expenditure items must include the funding source.)

PANOCHÉ ENERGY CENTER (06-AFC-5C)

Possible approval of an order granting the petition to amend the California Energy Commission Decision. Proposed changes include the installation of three (3) storage tanks, ranging from 250,000 gallons to 500,000 gallons that would temporarily store wastewater during operational periods where the net wastewater production exceeds the injection well capacity. The excess wastewater would be stored for later injection when wastewater production ceased. The proposed changes also include construction and operation of a permanent stand-by treatment system.
