FROM: Dylan Wright, Director

SUBJECT: **Approval of Addendum No. 1 to Final Mitigated Negative Declaration No. 191 for Final Closure and Post-Closure Maintenance Plan at Santiago Canyon Landfill for the U.C. Irvine/Ener-Core Landfill Gas Renewable Energy Project (OC Waste & Recycling CEQA Log #632)**

PROPOSED PROJECT:

The closed Santiago Canyon Landfill is a 113-acre landfill site that operated from 1968 to 1996. The landfill site is owned by the County of Orange and operated by OC Waste & Recycling. The site accepted mixed municipal and residential solid wastes. The total volume of refuse within the landfill is approximately 23.7 million cubic yards. Final closure construction at the landfill began in August 2002 and was completed in November 2004. The site is located off Santiago Canyon Road, east of the intersection of SR 261 and SR 241, adjacent and westerly of Irvine Lake. Direct access to the landfill from Santiago Canyon Road is provided by a paved access road. The address of the site is 3099 Santiago Canyon Road.

U.C. Irvine (UCI) and Ener-Core are proposing to construct and operate a landfill gas renewable energy facility adjacent to the existing flare station at the closed Santiago Canyon Landfill. A minor addition to Final Mitigated Negative Declaration (MND) No. 191 for the Final Closure and Post-Closure Maintenance Plan is required to incorporate the proposed project, as described in the attached Addendum No. 1 to Final MND No. 191 (attached).

AUTHORITY FOR ADMINISTRATIVE ACTION:

The Director of OC Waste & Recycling, pursuant to the authority granted in OCCO Sections 4-3-104, 4-3-126, and 4-3-137, takes the following administrative actions.

CEQA APPROVAL:

Standards for Preparing an Addendum

The CEQA Guidelines (Section 15164) provides for an Addendum as the vehicle to make minor changes when no new documentation is needed, as demonstrated by satisfying the following tests:

- The circumstances of the project are substantially the same, and Final MND No. 191 adequately addressed the effects of the proposed project.

- No substantial changes have been made in the project and there are no substantial changes in the circumstances under which the project is being undertaken.

- There is no new information of substantial importance to the project that is now known, which was not known or could not have been known when the prior Final MND No. 191 was adopted.

- The minor and/or technical additions, clarifications and/or changes to Final MND No. 191, disclosed in Addendum No. 1 to Final MND No. 191 do not raise new significant issues which were not addressed by Final MND No. 191.

- None of the circumstances described in CEQA Guidelines Section 15162, which require the preparation of a new Subsequent EIR or Negative Declaration, apply to the project.

Basis for Addendum

The project makes only minor changes to the project as originally approved by the County of Orange on December 15, 1999. No new environmental conditions or circumstances have occurred that would make the analysis included within Final MND No. 191 invalid, and all adopted mitigation measures remain enforceable.

Certification

I hereby certify that the subject project is approved.

Date: 3/5/15

Director, OC Waste & Recycling
