

JOB OPPORTUNITY BULLETIN

CLASSIFICATION: ENERGY COMMISSION SPECIALIST II (TED)

TIME BASE: FULL TIME

SALARY: \$6,028 - \$7,491

LOCATION: SACRAMENTO, CA

FINAL FILING DATE: UNTIL FILLED

DUTIES/RESPONSIBILITIES:

Under the general direction of the Energy Resources Specialist III (Supervisor), the Energy Commission Specialist II (TED) serves as part of the Energy Generation Research Office's management team to implement and administer energy research, development and demonstration (RD&D) efforts related to renewable energy and advanced generation technologies. The incumbent has working knowledge of solar energy technologies and familiarity with wind energy or other renewable resources. The incumbent will conduct highly complex technical analyses and coordinates with the RD&D functions of other public and private organizations related to renewable and advanced generation technologies. The incumbent helps plan, organize, implement, and report on the Energy Commission functions relating to renewable and advanced generation RD&D. The goal of the Energy Research and Development Division (ERDD) is to conduct RD&D to advance science and technologies not adequately provided by the regulated and competitive markets.

- Serve as a technical lead and resource for RD&D issues related to renewable and advanced generation technologies. The incumbent has advanced working knowledge in solar energy technologies and some familiarity with wind technology or other renewable and advanced generation technologies such as biomass, geothermal, small hydro and combined heat and power technologies. Provide guidance and direction for complex technical issues, and perform difficult analytical assessments and evaluations. Develop and manage complex and difficult Renewables RD&D projects and initiatives. Actively provide coordination between the Energy Commission and other state and federal programs. Coordinate with technical staff at state and local governments, the California Public Utilities Commission, federal agencies, national laboratories, academic institutions, and private organizations. Work with stakeholders and synthesize information from many sources regarding the direction for Renewable technology RD&D. Take a lead role in Renewables RD&D planning; implement task forces, technical working groups and advisory committees; guide the development of legislation and regulations as needed; and assist in the formulation of policy options and program initiatives for consideration by the Renewables and Advanced Generation Team Lead, ERDD management, Executive Office, Energy Commissioners, and the Legislature.
- Implement solicitations and collaborative strategies to meet the program objectives and goals, and provide recommendations to the Renewables and Advanced Generation Team Lead and Office Manager, and the Energy Research and Development Deputy Director, Executive Office and Energy Commissioners.
- Prepare complicated analytical reports and serve as resource in preparing and presenting conclusions and recommendation to the Commission, other governmental agencies, legislature, media and private entities. Organize, prepare and make presentation on technical results from renewable technology RD&D projects and initiatives at workshops, seminars and conferences.
