**NOTICE OF PROPOSED AWARDS****Alternative and Renewable Fuel and Vehicle Technology Program****Grant Solicitation GFO-15-605  
Light Duty Vehicle Hydrogen Refueling Infrastructure  
February 17, 2017**

On April 6, 2016, the California Energy Commission (Energy Commission) released a Grant Solicitation and Application Package entitled “Light Duty Vehicle Hydrogen Refueling Infrastructure” under the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP). The grant solicitation was an offer to fund projects that will expand the network of publicly accessible hydrogen refueling stations that serve California’s light duty fuel cell electric vehicles (FCEVs). The grant solicitation announced that there is a total of \$33.0 million available for the agreements resulting from this solicitation and that the Energy Commission, at its sole discretion, reserves the right to increase or reduce the amount of funds available. The solicitation offered funding for both capital expense grants and operation and maintenance (O&M) grants.

The attached table, “Notice of Proposed Awards”, identifies each applicant selected and recommended for funding by Energy Commission staff and includes the amount of recommended funding and score for capital expense grant agreements. This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission’s website at: <http://www.energy.ca.gov/contracts/index.html>. Funding for O&M grant awards will be noticed through a future Notice of Proposed Awards as funded stations are closer to becoming operational in accordance with solicitation requirements.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement.

Questions should be directed to: Kevyn Piper  
Grants and Loans Officer
