**REVISED NOTICE OF PROPOSED AWARD (NOPA)****Improving Natural Gas Energy Efficiency, Waste Heat-to-Power, and Near-Zero Emission Distributed Generation Systems****GFO-17-501****December 28, 2017**

On August 11, 2017, the California Energy Commission (Energy Commission) released a competitive solicitation to fund industrial energy efficiency and renewable energy and advanced generation research projects that focus on reducing natural gas use. Up to \$10,700,000 in Natural Gas Research Program funding is available to fund applications in:

- Group 1: Develop and Demonstrate Energy Efficiency Technologies and Strategies to Reduce Natural Gas Use in the Industrial Sector;
- Group 2: Develop and Demonstrate Cost-effective Waste Heat to Power Systems for California Industries;
- Group 3: Develop and Demonstrate Near-Zero Emission Small and Micro-scale Distributed Generation Systems; and
- Group 4: Technical Assessment of the Energy Efficiency Potential of the Chemicals and Allied Products Industry

The Energy Commission received 18 proposals by the due date of October 10, 2017. Each proposal was screened, reviewed, evaluated and scored using the criteria in the solicitation. 17 proposals passed the Stage One Application Screening.

The attached Revised "Notice of Proposed Award" (NOPA) identifies each applicant selected and recommended for funding by Energy Commission staff and includes the recommended funding amount and score. A previous NOPA was released on December 8, 2017 and covered results for Groups 2 and 3. This NOPA includes results for Groups 1 and 4, as well as additional funding allocated to Groups 2 and 3. The total amount recommended in this NOPA is \$9,816,831.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement. If the Energy Commission is unable to timely negotiate and execute a funding agreement with an Applicant, the Energy Commission, at its sole discretion, reserves the right to cancel or otherwise modify the pending award, and award the funds to another applicant.

In addition, the Energy Commission reserves the right to: 1) add to, remove, or shift funding between the different groups if there are insufficient passing proposals in one group and 2) negotiate with successful applicants to modify the project scope, schedule, and/or level of funding.

This NOPA also serves as a notice that the Energy Commission will not reopen the solicitation for Phase 2 proposal submissions.

This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission's website at:
www.energy.ca.gov/contracts/.

For information, please contact Angela Hockaday at (916) 654-5186 or
Angela.Hockaday@energy.ca.gov.

Project Group 1 – Develop and Demonstrate Energy Efficiency Technologies and Strategies
to Reduce Natural Gas Use in the Industrial Sector

Notice of Proposed Award

December 28, 2017

Rank Number	Project Applicant	Title	Energy Commission Funds Requested	Energy Commission Funds Recommended	Match Funds	Score	Award Status
Proposed Awards							
1	Element 16 Technologies, Inc	Low Temperature, Efficient Heat Capture to Reduce Natural Gas Consumption in the Chemical Industry	\$1,500,000	\$1,500,000	\$300,000	87.58	Awardee
2	University of California, Riverside	Demonstration of Smart Combustion Technology Using Natural Gas Fuel Quality Sensors	\$1,499,910	\$1,499,910	\$193,900	83.80	Awardee
3	Institute of Gas Technology dba Gas Technology Institute	Field Demonstration of High Energy Efficient and Low Emission Natural Gas Fired Combustion System for Industrial and Commercial Processing	\$1,499,897	\$1,499,897	\$435,000	82.88	Awardee
Total Funding Recommended			\$4,499,807	\$4,499,807	\$928,900		
Passed but Not Funded							
4	Institute of Gas Technology dba Gas Technology Institute*	High Efficiency Process Heating	\$1,405,947	\$0	\$1,500,000	78.35	Finalist
5	The Regents of the University of California, Davis	Novel Heat Recuperator and Thermally-Driven Chiller for Improving Natural Gas Energy Efficiency in CA Food Processing Industries	\$1,500,000	\$0	\$150,357	75.90	Finalist
Total			\$2,905,947	\$0	\$1,650,357		
Grand Total			\$7,405,754	\$4,499,807	\$2,579,257		

*Applicants may only receive one award per project group. See the solicitation manual, section 1.A for full details.
