**REVISED****NOTICE OF PROPOSED AWARD****Alternative and Renewable Fuel and Vehicle Technology Program  
Grant Solicitation PON-09-003  
Biomethane Production for Transportation****January 28, 2011**

On November 25, 2009, the California Energy Commission (Energy Commission) released a Grant Solicitation Application Package entitled "Biomethane Production for Transportation" under the Alternative and Renewable Fuel and Vehicle Technology Program. This grant solicitation was an offer to fund projects that involve the design, construction, and operation of biomethane production facilities. The grant solicitation announced that the maximum funding available for this solicitation was \$21.5 million; however, the Energy Commission reserved the right to increase this amount up to \$26 million. In this Revised Notice of Proposed Awards, the total funding has been increased to \$26 million, resulting in an additional proposed award.

The attached table, "Revised Notice of Proposed Awards", identifies each applicant selected to receive funding, the project title, the amount of recommended funding by the Transportation Committee, and scoring information. Funding of the proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Business Meeting at the Energy Commission in Sacramento, California, and execution of a grant agreement.

This notice is being mailed to all parties who submitted a proposal to this solicitation that has had a change in their results and is also posted on the Energy Commission's web site at: <http://www.energy.ca.gov/contracts/index.html>.
