REVISED NOTICE OF PROPOSED AWARDS
2011 Emerging Technology Demonstration Grants Program (ETDG II)
Grant Solicitation PON-11-501
April 6, 2012

On October 20th, 2011, the California Energy Commission's Public Interest Energy Research (PIER) Program released a Program Opportunity Notice (PON-11-501) entitled "2011 Emerging Technology Demonstration Grant Program (ETDG II)." The purpose of the solicitation was to fund emerging technologies in the industrial, agricultural and water sectors that will significantly reduce California's energy and water use. Proposers competed in the following project categories: 1) Water and Wastewater; 2) Data Centers; 3) Customer-Side Electricity Storage; and 4) Industrial Energy Efficiency Projects. For ETDG II, the minimum award size is \$750,000 with a maximum award size of \$2,000,000.

The proposals were screened, reviewed, evaluated, and scored using the criteria prescribed in the solicitation. Based on the Review Team's scores and suggested funding level, the Energy Commission released a Notice of Proposed Awards (NOPA) on March 2nd to award \$15,726,959 and fund twelve (12) of the eighteen (18) passing projects under this solicitation. The NOPA also stated that "should additional natural gas and electricity funding be made available, the remaining passing projects **may** receive funding," since the release of the NOPA on March 2nd additional funding has been made available to this solicitation for a total funding amount of \$19,894,338. Based on this new funding level, the Energy Commission proposes to also award ranked projects 13 to 16. This revised Notice of Proposed Awards is hereby issued pursuant to these recommendations. This revised NOPA also lowers the funding amounts to ranked projects 4 and 11 and changes in status for ranked projects 5 and 12.

The attached table titled "Revised Notice of Proposal Awards and Results of Submitted Proposals" identifies each of the applicants recommended to receive funding, the project title, the recommended amount of Energy Commission funding, and scoring information.

Final approval of these awards rests with the Energy Commission, which will consider each project at a publicly noticed Business Meeting at the Energy Commission in Sacramento, California.

This notice is being mailed to all parties who submitted a proposal to this solicitation and is also posted on the Energy Commission website at: <http://www.energy.ca.gov/contracts/>
