SECOND REVISED NOTICE OF PROPOSED AWARD FOR ROUND 2 FUNDING

Alternative and Renewable Fuel and Vehicle Technology Program

Grant Solicitation PON-13-609 Pilot-Scale and Commercial-Scale Advanced Biofuels Production Facilities

November 12, 2015

On January 14, 2014, the California Energy Commission (Energy Commission) released a Grant Solicitation and Application Package entitled “Pilot-Scale and Commercial-Scale Advanced Biofuels Production Facilities” under the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP) to provide funding for the development of new, or the modification of, existing California-based biofuel production facilities that can sustainably produce low carbon transportation fuels. The grant solicitation announced that there was a total of \$24 million available for the agreements resulting from this solicitation and that the Energy Commission, at its sole discretion, reserved the right to increase or reduce the amount of funds available.

In order to encourage “shovel-ready” projects and to ensure timely encumbrance of funds, the Energy Commission conducted two rounds of scoring. The evaluation committee conducted both rounds of scoring using the scoring criteria in the solicitation for applications passing the administrative screening. The Notice of Proposed Award – Round 1 was posted on May 7, 2014 and the Notice of Proposed Award – Round 2 was posted on July 18, 2014. On December 16, 2014, the Energy Commission issued a Revised Notice of Proposed Awards which increased the total funding to \$47.0 million, resulting in additional funding for diesel substitute projects.

The attached table, “Second Revised Notice of Proposed Award for Round 2 Funding”, reflects the cancellation of one proposed award and identifies an additional two Round 2 awardees for this Solicitation. This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission’s website at: <http://www.energy.ca.gov/contracts/index.html>.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Business Meeting at the Energy Commission in Sacramento, California, and execution of a grant agreement. If the Energy Commission is unable to timely negotiate and execute a funding agreement with an Applicant, the Energy Commission, at its sole discretion, reserves the right to cancel

the pending award and recommend funding to the next highest ranking eligible application. Applicants will be notified of such changes in a revised notice.
