**NOTICE OF PROPOSED AWARD (NOPA)**

**California Commercial End-Use Survey  
RFP-15-319  
March 25, 2016**

On December 30, 2015, the California Energy Commission released a competitive solicitation to select one contractor to support energy demand forecasting through surveying the characteristics of commercial sector utility customers. This project will facilitate the commercial success and market adoption of technologies, strategies and other innovations funded primarily through the EPIC Program. There is up to \$13 million available for this project. This includes \$8 million in Electric Program Investment Charge (EPIC) funding which is immediately available, and up to \$5 million of non-EPIC funding, contingent upon funds becoming available.

The Energy Commission received four proposals by the due date of February 26, 2016. The proposals were screened, reviewed, evaluated and scored using the criteria in the solicitation.

The attached "Notice of Proposed Award" identifies the Bidder that is recommended for funding by Energy Commission staff and includes the recommended funding amount and score. The total amount recommended is \$7,990,063.

Funding of the proposed project resulting from this solicitation is also contingent upon the approval of the project at a publicly noticed Energy Commission Business Meeting and execution of a contract agreement. If the Energy Commission is unable to timely execute an agreement with the Bidder, the Energy Commission, at its sole discretion, reserves the right to cancel or otherwise modify the pending award, and award funds to another applicant.

This notice is being mailed to all the Bidders who submitted an application to this solicitation and is also posted on the Energy Commission's website at:  
[www.energy.ca.gov/contracts/](http://www.energy.ca.gov/contracts/).
