Agenda Item Subject and Description:

WEST COAST CODE CONSULTANTS, INC. Proposed resolution approving Agreement 700-20-001 with West Coast Code Consultants, Inc. for a \$3,000,000 contract to provide the STEP Division with delegate chief building official services for approved project modifications and emergency power plant facility changes for a contract cycle of three years. (EFLCF funding) Contact: Joseph Bubbico.

G) California Environmental Quality Act (CEQA) Compliance

1. Is Agreement considered a "Project" under CEQA?

Yes (skip to question 2)

No (complete the following (PRC 21065 and 14 CCR

45378)):

Explain why Agreement is not considered a "Project":

Agreement will not cause direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment because the work under this agreement involves contract administration, plan reviews, site inspections, compliance monitoring and reporting, and technical support and code interpretation services when necessary.

2. If Agreement is considered a "Project" under CEQA:

a) ☐ Agreement **IS** exempt.

☐ Statutory Exemption. List PRC and/or CCR section number:

☐ Categorical Exemption. List CCR section number:

☐ Common Sense Exemption. 14 CCR 15061 (b) (3) Explain reason why Agreement is exempt under the above section:

b) ☐ Agreement **IS NOT** exempt. (consult with the legal office to determine next steps)

L) Selection Process Used

STATE OF CALIFORNIA

CONTRACT REQUEST FORM (CRF)

CEC-94 (Revised 12/2019)

CALIFORNIA ENERGY COMMISSION

- ☒ Solicitation RFQ Solicitation #: RFQ-19-703 # of Bids: 3 Low Bid ☒ No ☐ Yes
- ☐ Non Competitive Bid (Attach DGS-GSPD-09-007 <https://www.dgs.ca.gov/PD/Forms>)
- ☐ Exempt Select Exemption (see instructions)

M) Contractor Entity Type

- ☒ Private Company (including non-profits)
- ☐ CA State Agency (including UC and CSU)
- ☐ Government Entity (i.e. city, county, federal government, air/water/school district, joint power authorities, university from another state)

N) Is Contractor a certified Small Business (SB), Micro Business (MB) or DVBE?

If yes, check appropriate box(es): ☒ SB ☐ MB ☐ DVBE

O) Civil Service Considerations

- ☐ Not Applicable (Agreement is with a CA State Entity or a membership/co-sponsorship)
- ☐ Public Resources Code 25620, et seq., authorizes the Commission to contract for the subject work. (PIER)
- ☐ The Services Contracted:
- ☐ are not available within civil service
 - ☐ cannot be performed satisfactorily by civil service employees
 - ☐ are of such a highly specialized or technical nature that the expert knowledge, expertise, and ability are not available through the civil service system.
- ☒ The Services are of such an:
- ☒ urgent
 - ☒ temporary, or
 - ☒ occasional nature
- that the delay to implement under civil service would frustrate their very purpose.

Justification:

This work is cyclical in nature and because the Commission is unable to predict which projects or how many modifications may be needed to support the 79 power plants currently under the Commission's jurisdiction. Due to the nature of the DCBO services, obtaining services for a third party DCBO's is required

P) Payment Method

6	Non-Compliance and Incident Reporting and Resolution
7	"As-Built" Document Package and Archiving

ACRONYMS/GLOSSARY

Specific acronyms and terms used throughout this scope of work are defined as follows:

Acronym	Definition
CAM	Commission Agreement Manager
CBC	California Building Code
CBO	Chief Building Official
CBSC	California Building Standards Code
CEC	California Energy Commission
COCs	Conditions of Certification
CPM	Compliance Project Manager
DCBO	Delegate Chief Building Official
DCM	Document Control Manager
DESCP	Drainage, Erosion, and Sediment Control Plan

DTST	Document Submittal and Tracking System
DVBE	Disabled Veterans Business Enterprise
EOR	Engineer of Record
LORS	laws, ordinances, regulations and standards
MS	Microsoft
PCR	Periodic Compliance Reports
QA/QC	quality assurance/quality control
STEP	Siting, Transmission, and Environmental Protection

BACKGROUND/PROBLEM STATEMENT

The Warren-Alquist Act grants the CEC exclusive jurisdiction to regulate the construction, operation, modification and closure of thermal power plants 50 megawatts or greater.¹ The CEC has authority for compliance verification for power plants under its jurisdiction and acts as the Chief Building Official (CBO).² Under the California Building Standards Code (CBSC) and Title 20 of the California Code of Regulations, the CEC can designate a Delegate CBO (DCBO) to aid with CBO responsibilities.³ The DCBOs carry out the design review and construction inspections on behalf of the CEC. Through this delegation, the DCBO performs this responsibility through 1) engineering plan and technical specification review, analysis and calculation; and 2) DCBO staff or a certified third party for field inspections and testing procedures. The DCBO also works with CEC staff to enforce local building codes.

Historically, the CEC does not employ staff with CBO experience since this work is cyclical in nature and because the CEC is unable to predict which projects or how many modifications may be needed to support the 78 power plants currently under the CEC's jurisdiction. Due to the nature of DCBO services, obtaining services from third party DCBOs has been required.

OBJECTIVES OF THE AGREEMENT

The objective of this agreement is to assist the STEP Division with compliance oversight for approved project modifications or emergency power plant facility changes for a contract cycle of three years. With the DCBO's assistance, the Compliance Office can ensure that these modifications are completed on schedule and in accordance with all COCs.

FORMAT/REPORTING REQUIREMENTS

Deliverables/Reports

¹Warren-Alquist State Energy Resources Conservation and Development Act (Pub. Resources Code, §§ 25000 et.seq.) (Warren-Alquist Act).

²Warren-Alquist Act § 25532

³California Building Standards Code Title 24, Part 2, Section 103.3 Deputies; Cal. Code. Regs., tit. 20, § 1770

When creating reports, the Contractor shall use and follow, unless otherwise instructed in writing by the Commission Agreement Manager (CAM), the latest version of the Consultant Reports Style Manual published on the CEC's web site:

http://www.energy.ca.gov/contracts/consultant_reports/index.html

Each final deliverable shall be delivered as one original, reproducible, 8 ½" by 11", camera-ready master in black ink. Illustrations and graphs shall be sized to fit an 8 ½" by 11" page and readable if printed in black and white.

Electronic File Format

The Contractor shall deliver an electronic copy (CD ROM or memory stick or as otherwise specified by the CAM) of the full text in a compatible version of Microsoft Word (.doc).

The following describes the accepted formats of electronic data and documents provided to the CEC as contract deliverables and establishes the computer platforms, operating systems and software versions that will be required to review and approve all software deliverables.

- Data sets shall be in Microsoft (MS) Access or MS Excel file format.
- PC-based text documents shall be in MS Word file format.
- Documents intended for public distribution shall be in PDF file format, with the native file format provided as well.
- Project management documents shall be in MS Project file format.

Administrative Tasks

The administrative tasks are outlined in Task 1 Project Team Management and Quality Control below.

Task 1 – Project Team Management and Quality Control

The goal of this task is to perform contract management and administrative duties and to manage the work assigned via work authorizations. Tasks 1.1, 1.2, and 1.3 are authorized to be completed without a separately executed work authorization as these activities involve the development and management of work authorizations and coordination of the team.

Task 1.1 –Contract Management and Administrative Duties

The DCBO shall:

- Understand and become familiar with each Project's COCs applicable to each project.
- Attend and participate in CEC team meetings as requested by the CAM.
- Work with the CAM to ensure all pre-construction submittals, if applicable, are complete before issuance of a Notice to Proceed.
- Prepare, after approval of potential work tasks by the STEP Division management, information for work authorization development for CAM, including proposed task language, schedule of deliverables, and work authorization budget.
- Prepare and execute agreements with subcontractors, if applicable, that convey all provisions contained in the Agreement and specific work authorizations between the CEC and the Contractor.

- Enforce subcontract provisions, and in the event of failure of the subcontractor to perform satisfactorily, recommend actions to resolve the problem.
- Require subcontractors to provide invoices which correctly identify personnel, rates, actual hours, and direct expenses charged to each task of each work authorization and which provide adequate documentation to justify expenses, including electronic copies of completed deliverables. Maintain electronic record of invoices and invoice documentation, including completed deliverables. Subcontractor invoices will be reviewed by the Contractor and the CAM for accuracy and completeness.
- Provide monthly progress reports by the tenth of each month to the CAM on the Contractor's and subcontractors' progress for work assignments, including a summary of contract expenditures to date.
- Submit monthly invoices to the CEC's Accounting Office with a copy to the CAM. Invoices shall indicate the labor costs, operating expenses, fees and Disabled Veterans Business Enterprise (DVBE) amounts. Invoices shall coincide with the monthly progress report timeframe. Invoices will not list work authorizations not issued at the time of invoice preparation.
- Share contract-related information with CEC staff and track the status of all work authorizations on a secure website. This secure website can also house the On-Call DCBO project activity reporting data required in Tasks 1.2 and/or the more complex Document Submittal and Tracking System (DSTS) delineated in Task 2 below.

Task 1.2 – Document Submittal and Tracking System

More significant power plant repair and restoration activities can often involve concurrent demolition, design and construction efforts. This “fast-track” approach requires well-organized processes in place to name and track all submittals in their various stages of development and review. Conversely, significant time may pass between subsequent submittals of the same package. To keep all parties on track with larger reconstruction/repair projects, it is important that all DCBO comments are well documented, and that a standardized electronic file-naming protocol is used.

The On-Call DCBO shall:

- Track and maintain power plant project submittals on a web-based electronic Document Submittal and Tracking System (DSTS), designed to minimize hard-copy transmittals, that includes but is not limited to the following:
 - Username and password protection to restrict access to submittals.
 - The DSTS must provide submittal associative links to review comments, document approvals, inspection requests, and construction approvals.
 - File names that include:
 - The COC section abbreviation and number (i.e. “STRUC-1”);
 - A short but recognizable description of the submittal type and document contents; and
 - The version or revision number, including the date received and the date returned or approved.

- A multi-level file structure that can organize the submittals by various document characteristics and allow the user to easily identify the status of the submittal through the approval process. For example, using a query function, the user should be able to identify and/or review:
 - The COC section requiring the submittal;
 - Chronological order and date of the submittal;
 - Approval status of the submittal, including partial approvals;
 - Time anticipated (due date) for completion of the DCBO's review;
 - Document review comments;
 - Subsequent re-submittal of the corrected documents;
 - Approval signature by the DCBO Firm;
 - A separate file for the latest approved revision and another file for all the previous revisions (i.e., if the latest approved revision is number 5, then that revision should have its own file; revisions 1-4 should be together in another file to be used if needed);
 - Construction inspection requests;
 - Notices of non-conformance;
 - Inspection comments, rejections, and approvals;
 - Special inspections; and
 - Safety Inspections.
- A query function to locate and determine the status of every submittal, drawing, inspection, report, or other document. The query function must have the capability to link with the submittal and to gather data relating to the various sections within the COC. For example, an authorized individual should be able to query a list of all STRUC-1 compliance submittals.
- Maintain a DSTS log that follows the file structure logic to track submittals from original receipt through final inspection. The submittal log should provide a means to identify:
 - Which documents are contained within a submittal;
 - Which documents have been approved;
 - Which documents have been revised; and
 - The current document revision number.
- Maintain an accessible historical DSTS document archive of all documents submitted to the DCBO for authorized individuals. Simply having the most current version of a document in the document tracking system does not provide an adequate record of the submittal history.
- Maintain the minimum types of project documents including: construction drawings; supporting calculations; construction specifications; inspections; special inspections; worker safety records; and when applicable, environmental monitoring records.
 - Documents submitted to the DCBO must be in an Adobe Acrobat® .pdf, secure, electronic file format, and if an Engineer of Record (EOR) is associated with the submittal, it must include a digital signature.

If approved by the CAM, minor variations to the document tracking structure described herein, and alternative methods of saving documents within a traditional, multi-level file structure may be acceptable, provided they function in a similar manner. Database and/or document tracking systems are acceptable, provided they are organized with a search engine that locates submittals and documents in the same logical fashion as would be done within a traditional data file-server structure.

Task 1.3 –Project Coordination Meetings

As directed by the CAM, the On-Call DCBO shall attend project-specific coordination meetings and be prepared to provide information regarding the timing, schedule, and critical path issues for COC compliance and monitoring.

Work Authorization Tasks

In addition to the contract management, document tracking, coordination meetings and activity reporting duties of Task 1, the On-Call DCBO will be asked to perform other tasks through the drafting and execution of a work authorization. The following tasks identify the CEC's anticipated needs. No work shall be undertaken unless authorized by the CAM through a work authorization, except for work detailed in Task 1.

Task 2 – Rapid Onsite Mobilization and Response and Pre-Construction Compliance Assistance

Work Authorizations for this task may include, but are not limited to, the following activities:

- Oversight for unanticipated or temporary project modifications, or for reconstruction activities that include a list of pre-construction submittals that must be approved before the CEC can authorize reconstruction or issue a formal Notice to Proceed.
- Preliminary site assessments, document review and pre-construction COC compliance, although the CEC retains the final authority over all matters relating to interpretation of the COCs. The amount of time required for this type of work will vary from project to project.

Task 3 – Reports

Work Authorizations for this task may include, but are not limited to, the following activities:

- Create a CEC staff accessible and secure web folder for each approved work authorization to track progress and house reporting information.
- Gather and review all applicable pre-existing project specific “as-builts” and compliance plans. The On-Call DCBO shall work with the CAM to ensure all pre-construction submittals are complete before issuance of a Notice to Proceed.
- Prepare, as directed by the work authorization, project specific periodic compliance reports (PCR). The documents on the website will be posted in an MS Word- or Excel-compatible format, and applicable submittals may need to be converted to Adobe Acrobat® .pdf files. The PCRs for each applicable work authorization include, but are not limited to, applicable components listed below:
 - List of On-Call DCBO staff onsite and their duties;
 - Executive summary of current demolition, repair or reconstruction activities, broken down by facility design engineering elements:
 - General (GEN);
 - Civil (CIVIL);
 - Structural (STRUC);

- Mechanical (MECH);
- Electrical (ELEC);
- Safety; and
- Environmental (as applicable);
- Project completion percentage, based on the amount of work completed to date for all systems before plant operation or restart;
- Compliance issues with applicable LORS and all COCs;
- List of issued or potential non-conformance reports;
- List and status of submitted plans;
- Status of interconnections;
 - Natural Gas
 - Backfeed
 - Potable Water
 - Waste Water
 - Fire Water
- A “look ahead” schedule or scheduling forecast for construction progress;
- A site map (including a scale bar and directional key) and date-stamped project photographs identifying construction activities with a brief description broken down by facility design engineering elements;
- Estimate of construction staff/contractors onsite;
- List of field inspections performed since previous PCR (inspection reports shall be posted for CAM review no longer than 3 days after inspection was done); and
- List of any job related accidents whether recordable or not.
- Provide initial and periodic refresher training support to the CAM, CPM, CEC staff and project team on the On-Call DCBO’s project activity reporting website as applicable.
- Maintain, via a document control manager (DCM), a log of all email correspondence pertinent to the work authorizations including all submittals, reviews, comments, approval, inspection requests, and inspection activity.
- Provide document security and backup protocols to the CAM for review and approval to ensure that the electronic submittal process is secure and data can be re-established if it is lost or damaged.

Task 4 – Construction Plan Review

The bulk of the work performed by the On-Call DCBO involves the review of construction drawings, calculations, and other documents supporting the project’s engineering activities. The On-Call DCBO should also anticipate document submittals concurrent with demolition activities and on-going construction.

Project owners often submit multiple documents/drawings within a single submittal. The On-Call DCBO shall review the submittal and approve individual documents within a submittal if

possible to expedite the document review process. The documents/drawings that require re-work will be allowed to be resubmitted alone as a revision to the original submittal.

Work Authorizations for this task may include, but are not limited to, the following activities:

- Review, and when found to be in compliance with all applicable LORS, approve the selection of dynamic analysis and/or alternative methods of analysis for the design of those major structures designated in the project's Facility Design COCs;
- Ensure that the results of all plan checks and construction inspections are available to the CAM via the On-Call DCBO website;
- Retain all approved plans, specifications, calculations, and marked-up "as-builts" for 90 days after the project's construction completion date, after which the On-Call DCBO shall deliver them to the Project Owner for long-term retention at the project site or other accessible location;
- Provide electronic copies of the approved plans, specifications, calculations, marked-up "as-builts," and other relevant submittals to the CAM in the form of DVDs, compact discs or a USB memory stick within 90 days of the project's construction completion date (see Task 7);
- Code interpretation and enforcement support; and
- Potential plan amendment analyses support.

Task 5 –Construction Compliance and Field Inspections

The On-Call DCBO's responsibilities may also include conducting field inspections and providing COC compliance oversight. In this role, the DCBO is responsible for the inspection of constructed facilities to ensure compliance with the approved construction drawings. The CBSC requires that all plans be reviewed and approved before construction. There are tasks not typically performed by building department inspectors that are a part of the CEC's On-Call DCBO responsibilities. These include, but are not limited to, compliance items identified below and within each individual project's COCs.

Work Authorizations for this task may include, but are not limited to, the following activities:

- Review and approve any of a project's proposed special inspection programs; approve the qualifications and experience of the proposed special inspectors; monitor the DCBO approved special inspectors work as needed in the field; and review the special inspectors daily reports to ensure all CBC requirements are met.
- Maintain, as directed by the CAM, a site presence and an on-site field office during demolition and construction activities.
 - Issue as necessary correction notices and non-conformance reports to ensure COC and LORS compliance.
- Select, as directed by the CAM, a Certified Safety Monitor who reports directly to the On-Call DCBO and the CAM; the Certified Safety Monitor's role includes, but is not limited to, conducting on-site (including linear facilities) safety inspections to verify that the Construction Safety Supervisor implements all appropriate Cal/OSHA and CEC safety requirements.
 - The Safety Monitor will conduct on-site safety inspections during demolition and construction at intervals necessary to fulfill those responsibilities.

- The Safety Monitor will have the authority to issue a stop work order for unsafe conditions found on the work site. The stop work order will be in writing and given to the Construction Safety Supervisor with the necessary conditions to remedy the unsafe condition(s) before work can resume.
- The Safety Monitor will ensure that the corrective actions have been properly taken by the Construction Safety Supervisor before work can resume.
- Provide an inspection notification process that includes independent feedback to the project team and CAM when multiple or repeated inspection failures have occurred.
- Select an On-Call DCBO Team Engineer, as directed by the CAM, to oversee engineering demolition and reconstruction compliance, as may be required by the Facility Design, Geology, and Transmission System Engineering COCs, as well as the Storm Water Pollution Prevention Plan and Erosion Control Plan (SWPPP) and the Drainage, Erosion, and Sediment Control Plan (DESCP).
- Engineering and construction monitoring support.

Task 6 – Non-Compliance and Incident Reporting and Resolution

The primary responsibility of the On-Call DCBO is to ensure compliance with local building codes; the CBSC; the Facility Design, Geology and Transmission System Engineering COCs; Workers Safety; Fire Protection; the SWPPP, the DESCP, and other applicable LORS. As per Task 1 above, if a non-conformance report is issued, it must be reported to the CAM (on a per incident basis or in the next PCR). The non-conformance report should only be issued after all other measures are exhausted (i.e. correction notices, discussion with CAM, etc.) to seek compliance.

Work Authorizations for this task may include, but are not limited to, the following activities:

- Communicate any concerns regarding a Project Owner's design and quality assurance/quality control (QA/QC) process and documentation to the CAM for issue resolution.
- Take any action allowed by the California Code of Regulations, the CBSC and applicable LORS to ensure that the CEC's interests are properly addressed and protected.
- Seek the cooperation and assistance of the CAM prior to initiating a stop-work order. For emergency situations, the DCBO may initiate a stop-work prior to notifying the CAM or the Compliance Office Manager if the CAM is not available. For any action taken under emergency conditions, the CAM must be notified within 4 hours of the action.

Task 7 – “As-Built” Document Package and Archiving

The On-Call DCBO is responsible for the oversight/development of the as-built document package within 90 days of project/amendment construction completion. The as-built drawings originate from redlined construction drawings and these drawings are maintained by the project development team at the power plant site. The On-Call DCBO construction inspectors will ensure that the project development team captures field changes. The On-Call DCBO will receive the revised construction drawings from the project development team's EOR and combine them with the project supporting documents to create the as-built document package. The submittal of the as-built document package to the CEC is for document archival purposes as required by the COC's.

Work Authorizations for this task may include, but are not limited to, the following activities:

- Ensure that the project development team captures field changes for the as-built document package.
- Receive the project development team's revised construction drawings from the EOR and combine them with the project supporting documents to create the as-built document package.
- Develop and submit as-built electronic file package consisting of construction drawings and supporting documents including, but not limited to, the following:
 - Construction drawings;
 - Supporting calculations;
 - Construction specifications;
 - Inspection records;
 - Special inspection records; and
 - Worker safety records, etc.
- Submit one copy to the CEC and one copy to the Project Owner of all volumes of the as built document package on CD-ROM, DVDs or USB memory stick, saved in Adobe Acrobat® .pdf file format, and organized by COC section:
 - General - GEN;
 - Civil – CIVIL;
 - Structural – STRUC;
 - Mechanical – MECH;
 - Electrical – ELEC; and
 - Transmission Systems Engineering– TSE.

The DCBO is responsible for verifying the completeness of this package, which should include any additional related facilities⁴ within the CEC's jurisdiction that are not included in the six facility design elements above.

SCHEDULE OF DELIVERABLES AND DUE DATES

Task Number	Deliverable	Due Date
1		
1.1	Draft Work Authorizations	As necessary As requested
1.1	Monthly Progress Reports	Monthly
1.1	Submit monthly invoices	Monthly
1.2	DSTS System Setup including provide compliance team access and training	November, 2020
1.3	Project Coordination Kick-Off Meeting	November, 2020
1.3	Project Coordination Kick-Off Meeting (project/Work	As necessary

⁴ Cal. Code Regs. tit. 20, §1201(r)

	Authorization Specific)	As requested
--	-------------------------	--------------

Work Authorization (WA) deliverables and due dates will be specific to each to each WA as they are approved by the CAM.

STATE OF CALIFORNIA

STATE ENERGY RESOURCES
CONSERVATION AND DEVELOPMENT COMMISSION

RESOLUTION - RE: WEST COAST CODE CONSULTANTS, INC.

RESOLVED, that the State Energy Resources Conservation and Development Commission (CEC) adopts the staff CEQA findings contained in the Agreement or Amendment Request Form (as applicable); and

RESOLVED, that the CEC approves Agreement 700-20-001 with West Coast Code Consultants, Inc. for a \$3,000,000 contract to provide the STEP Division with delegate chief building official services for approved project modifications and emergency power plant facility changes for a contract cycle of three years; and

FURTHER BE IT RESOLVED, that the Executive Director or his/her designee shall execute the same on behalf of the CEC.

CERTIFICATION

The undersigned Secretariat to the CEC does hereby certify that the foregoing is a full, true, and correct copy of a Resolution duly and regularly adopted at a meeting of the CEC held on November 10, 2020.
