

# BUILD

Building Initiative for Low-Emissions Development Program

## Induction Cooktops

Kicker Incentive Opportunity

### Incentive Amount

**\$300/**

induction cooktop unit

50x induction  
cooktops=

**\$15,000**

**Induction cooktops** use an electromagnetic field to heat food. An electric current passes through a coil under the surface of the cooktop, creating a magnetic field which induces a current in the pan creating heat and cooks the food.

### Benefits

- Superior temperature control and heat up time
- Less heat escapes from the cookware into the surrounding area
- Does not produce harmful pollutants due to combustion of gas
- Mitigates burn and fire risks

### Product Resources and Considerations

- Compatible cookware for induction cooktops include the following:
  - Carbon Steel and Magnetized Stainless Steel
  - Cast Iron and Enameled Cast Iron
  - Graniteware
- BUILD documentation requirements apply

BUILD is administered by the California Energy Commission in collaboration with the California Public Utilities Commission. It is authorized by Senate Bill 1477 (2018, Stern) and funded by the four California gas corporations apportioned according to each gas corporation's percentage share of allocated Cap-and-Trade Program allowances. Reservations are approved on first come, first served basis, and regional funding availability is based on the utilities' contribution to the program.
