

# PROMETHEUS ENERGY

## CALIFORNIA LNG PROJECTS

Prepared for:

LNG INTERAGENCY WORKING GROUP MEETING

July 26, 2007

**PROMETHEUS***energy*

# Presentation Outline

---

1. Prometheus Energy Company Overview
2. California LNG Market Overview
3. California LNG project summaries
4. Downstream LNG activities
5. Questions

# Company Overview

Prometheus Energy Company is a vertically integrated LNG production and Supply Company which specializes in utilizing waste and stranded gas resources

---

## *Key Facts*

- Founded 2003
- 60 Employees
- Publicly listed on London Stock Exchange (PEC)

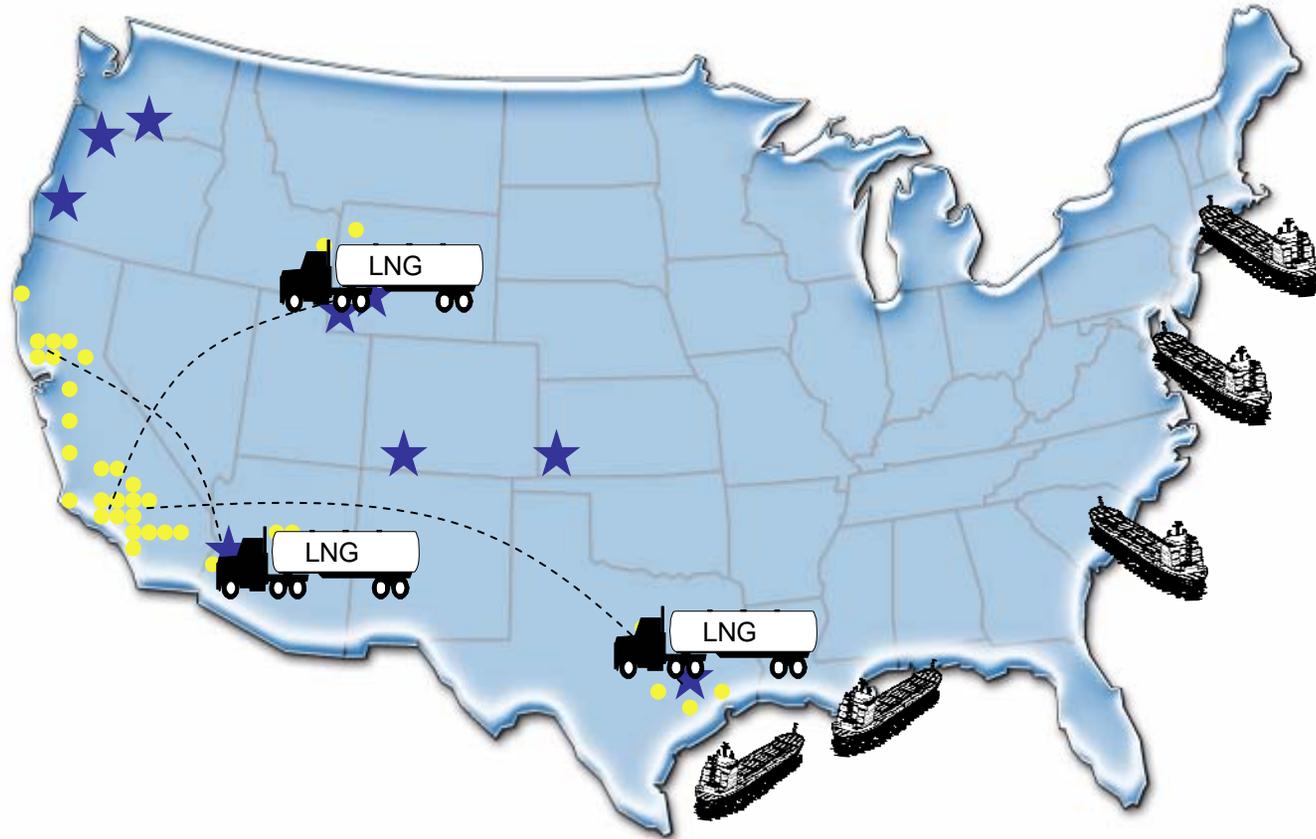

★ = Prometheus Office

# LNG Vehicle fuel Market

Prometheus distributed LNG production model places LNG sources close to end users

---

# Bowerman LFG-to-LNG

The Bowerman Landfill is currently flaring enough waste gas to produce 40,000 gallons of LNG per day

**PROMETHEUS**energy

# Kiefer Road LFG-to-LNG

Through a competitive bid process Prometheus was awarded the right to build, own and operate a LFG-to-LNG project at the Kiefer Road Landfill in Sacramento County

---

**PROMETHEUS***energy*

# Kiefer Road LFG-to-LNG

A portion of the expected 12,000 LNG gallons produced on a daily basis at the future site will fuel the 105 county LNG refuse haulers that make daily trips to the site

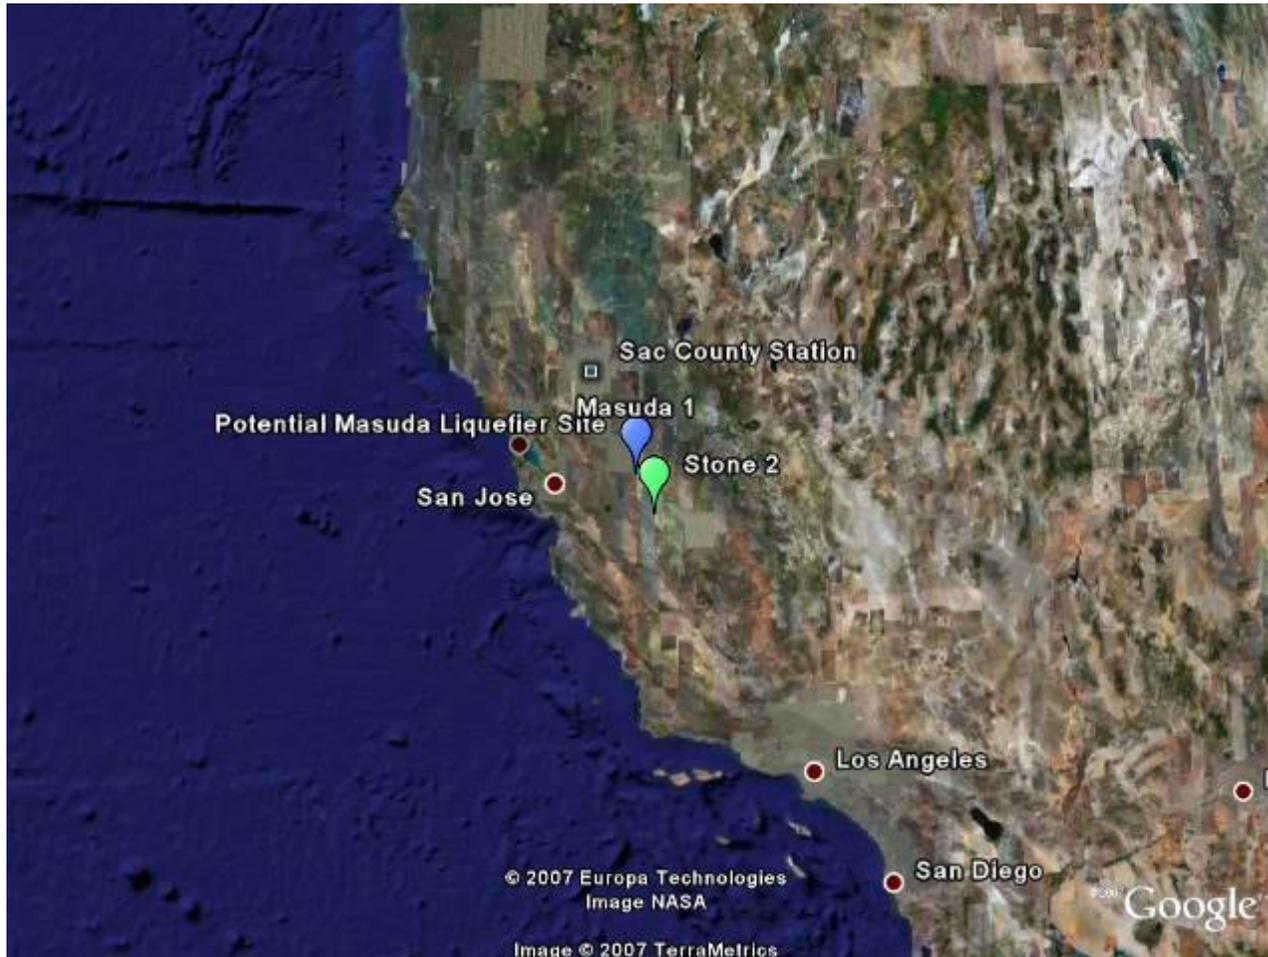

---

# Central Valley LNG Projects

Prometheus has contracted two gas sources in the Central Valley for the production of LNG

---

# Central Valley LNG Projects

One of the two 5,000 gallon per day systems to be re-deployed is shown here installed in Stockton, CA

# Central Valley LNG Projects

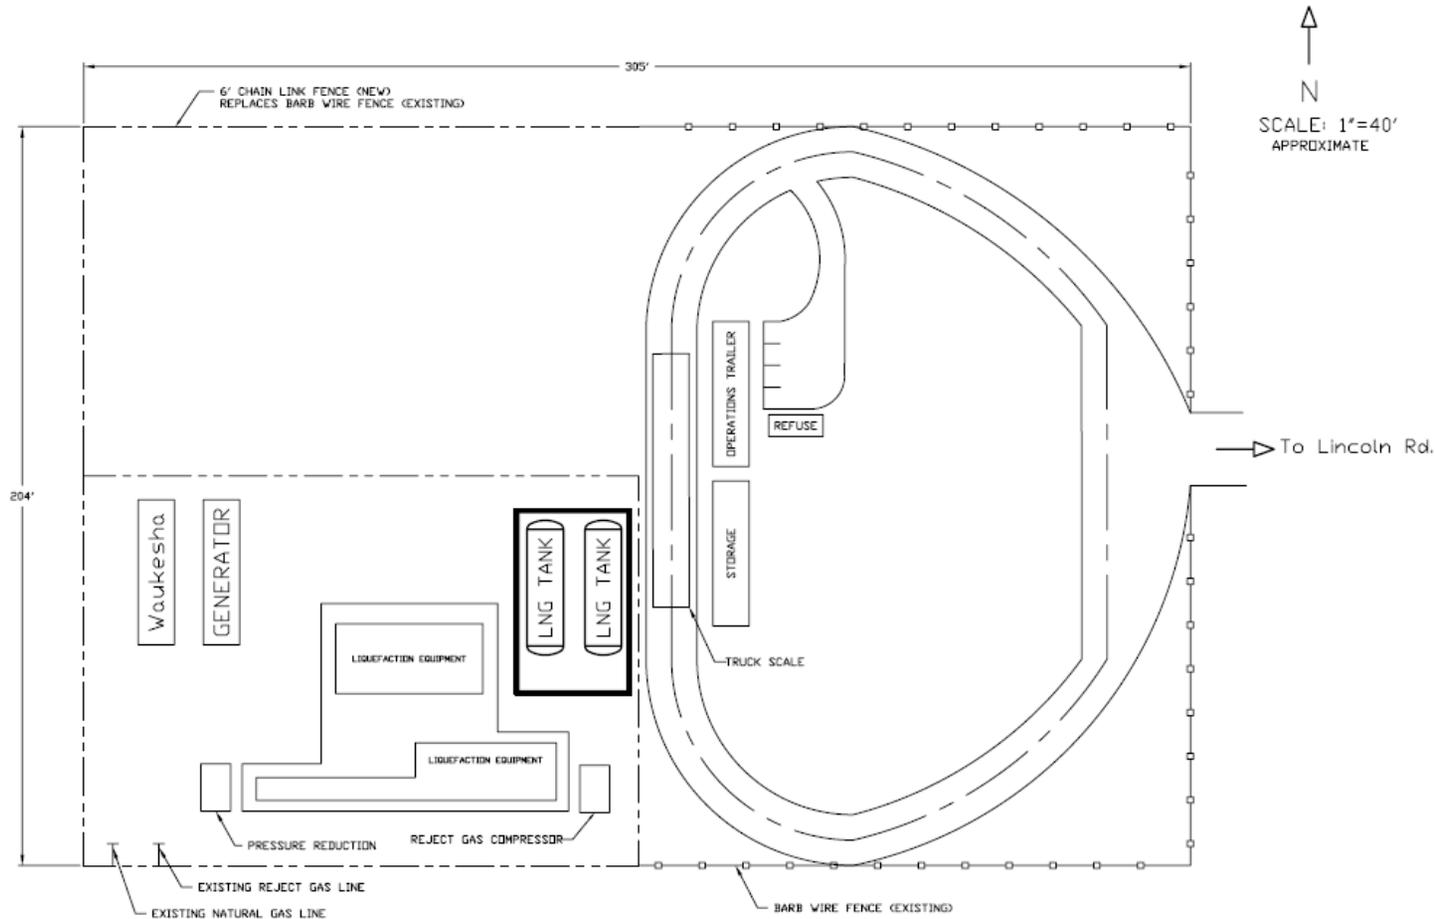

The second 5,000 gpd system is shown here in Prometheus' Seattle warehouse facility

**PROMETHEUS**energy

# Central Valley LNG Projects

The two 5,000 gpd systems will be operated in parallel at one site

# Prometheus LNG Tanker

Prometheus' HPDI LNG powered tractor produces 20% less GHG's than comparable model year diesel trucks

---

**PROMETHEUS**energy

# Downstream LNG Development

Prometheus is assisting SSA Marine in converting yard hostlers from diesel to clean burning LNG at the Port of Long Beach

# Conclusion

More and more reliable LNG sources are going to be needed to feed the growing demand for clean transportation fuels in California
