

Los Angeles County Assessment

Routes taken from the WebTRAGIS (Transportation Routing Analysis Geographic Information System, ORNL) map created by Fred Dilger of Nevada in 02/2005 utilizing the DOE mostly truck scenario over 24 years data published in the FEIS. (map attached)

Routes in L.A. County:

Northern approach, I-5 to I-210, I-210 to I-605, I-605 to I-10, I-10 out of the county.

Southern approach, I-5 to I-605, I 605 to I-10, I-10 out of the county.

The southern approach will see well below 1500 shipments, the northern approach could see anywhere up to 1500 shipments. I-10 will have the greatest number of shipments in the county as it combines both approaches.
