## **Notice of Availability of the Renewables Portfolio Standard 2007 Procurement Verification Report**

The California Energy Commission adopted the *Renewables Portfolio Standard 2007 Procurement Verification Commission Report* at its June 15, 2011 Business Meeting. This *2007 Verification Report* is now available from the Energy Commission's website at:

[\[www.energy.ca.gov/portfolio/documents/index.html\]](http://www.energy.ca.gov/portfolio/documents/index.html)

The *Verification Report* details to the California Public Utilities Commission (CPUC) the Energy Commission's Renewables Portfolio Standard (RPS) procurement verification findings by select retail sellers of electricity under California's RPS. This report presents RPS procurement verification findings for 14 retail sellers, including investor-owned utilities (large and multijurisdictional utilities) and electric service providers; there are no small utilities or community choice aggregators reporting for 2007. It also includes an update to Pacific Gas and Electric Company's 2004-2006 RPS procurement amounts and an update to PacifiCorp's 2005-2006 RPS procurement amounts.

This *Verification Report* transmits the Energy Commission's RPS procurement verification findings to the CPUC. The report:

- Verifies RPS-eligibility of the renewable energy facilities from which each reporting retail seller procured energy and the associated renewables attributes.
- Verifies, to the extent possible, that the amount of energy procured by each retail seller was sufficiently generated by each RPS-eligible facility.

- Verifies, to the extent possible, that RPS procurement exclusively serves California's RPS and does not support another renewable energy regulatory or market claim.
- Indicates the eligible and ineligible RPS procurement claims per retail seller and provides the total amount of eligible RPS procurement.
- Verifies that out-of-state renewable facilities satisfy the Energy Commission's RPS delivery requirements.
- Provides analysis of RPS-eligible claims, including availability of generation data for verification, RPS-eligible procurement by resource type, and procurement from new and repowered generation.
- Discusses the limitations of the Interim Tracking System.

Pursuant to CPUC Decision 06-10-050 and a November 20, 2008 CPUC Ruling (R.08-08-009), the CPUC adopted a schedule for filing and serving verified RPS compliance reports, wherein, entities covered by the Verification Report must file and serve verified RPS compliance reports within 30 days after issuance of the Verification Report. For the purpose of initiating the 30 days, the November 20, 2008 CPUC Ruling states that the Energy Commission's issue date for the Verification Report is the date the Energy Commission publishes its "notice of availability" of the report.

This document is available free from the Energy Commission's website at:
