

CALIFORNIA ENERGY COMMISSION

# New Solar Homes Partnership

## ADMINISTRATION ISSUES

Bill Blackburn

Supervisor, Renewable Energy  
Program

## Background

- CEC has provided both oversight and program administration for ERP since inception
- We have been interested in exploring alternative admin options
- Have heard interest expressed by IOUs in administering the NSHP
  - See synergies; EE programs, existing or future customers, etc.

## *Discussion Points*

### 1) Commitment, Structure

- Commit to program administrator?
- What kind of structure or model do you envision? (e.g., similar to the Self Gen Working Group?)
- What mechanism, such as contractual, MOU, etc. is needed?
  - How will payments be made? (CEC may be required to make payment)

## *Discussion Points*

### 2) Costs, Timing, Roles

- What administrative costs do you expect?
- What role is needed with the CPUC?
- What timeframe should we expect to make the transition from CEC to the utility?

## *Discussion Points*

### 3) Coordination

- How can oversight, marketing/outreach and program evaluation be coordinated?
- How can we make the program (database, admin differences, etc.) seamless and transparent throughout the state?
