

The ***Fuels Report*** is prepared in response to legislative requirements specified in Public Resources Code Section 25310(a). The statute calls for the California Energy Commission to submit to the Governor and Legislature a comprehensive report describing emerging trends and long-range forecasts of the demand, supply and price of petroleum and petroleum products, natural gas, coal, and synthetic and other fuels. The report also must include specific recommendations for legislative or administrative actions needed to maintain sufficient, secure and affordable fuel supplies for the state.
