Session: Getting to Zero Net Energy Buildings
This session will explore the challenges of implementing zero net energy commercial and municipal buildings. Each project uses a different NZE strategy and/or process, measure the outcomes and share the lessons learned with the building community.
Moderator: David Maggioncalda
Building Affordable Zero Net Energy Homes (Stockton, CA)
Presenter: Garth Torvus, CEI

Innovative Strategies to Drive Zero Net Energy in Grocery Stores (San Francisco)
Presenter: Aaron Daly, Whole Foods

Session: Planning for a Clean and Resilient Electric System
This session will highlight research on the pathways for the electric system to reach California’s clean energy goals and reduce greenhouse gas emissions, and share the new tools and utilities are using to inform their market to system vulnerability to climate impacts.
Moderator: Guido Franz
Low Carbon Energy Scenario Insights for a Resilient Electric System
Presenter: Max Wei, Lawrence Berkeley National Laboratory
Technology and Risk Assessment in GHG Mitigation Pathways
Presenter: Shuler Price, Energy and Advanced Technologies Government Commission

Session: Improving Water and Energy Efficiency
This session will explore projects and solutions that target disadvantaged communities and its occupants lower energy costs and provide new opportunities such as building improvements and access to energy and other social benefits. This session will also discuss how to best reach the sector to ensure long lasting and sustainable benefits.
Moderator: Faiks Villanueva
Maximizing Energy Efficiency in an Existing Low-Income Mixed Use Rental and Commercial Building (San Francisco)
Presenter: Cindy Wu, ChinaInnov
Community Development Center and Sian Law, RWMiller Architecture & Interiors
Retrofitting Multifamily Properties for Disadvantaged Communities
Presenter: Monica Rangel, California Public Utilities Commission

Session: Leveraging Emerging Technology to Meet California’s Advancing Energy Landscape
This session will explore projects and strategies that target disadvantaged communities and its occupants lower energy costs and provide new opportunities such as building improvements and access to energy and other social benefits. This session will also discuss how to best reach the sector to ensure long lasting and sustainable benefits.
Moderator: Max Wei
Leveraging Emerging Technology to Meet California’s Advancing Energy Landscape
Presenter: Srinivas Sukumar, Encanto Neighborhood

Demonstrating a Cost-Competitive Blackstone Corridor Financing Platform for Fresno’s Anchor District
Presenter: Jennifer Vargas, California Public Utilities Commission
