Dear Mr. Harland:

My name is Tom Stallard and I am the mayor of Woodland, CA. I want you to know how important the California Lighting Technology Center at UC Davis has been to the people of Woodland. Michael Siminovitch and his team have been very helpful to us in developing energy demand reduction strategies throughout the community. We have replaced all our signals and all our street lights with LEDs. We are also proud of the bi-level parking lot lighting at Woodland High School. We know there are many more good ideas yet to come as our community aspires to achieve net zero sometime in the next couple of decades. We do appreciate and rely on the expertise that CLTC offers us as we make energy choices about our future. Thank you.

Tom Stallard, Mayor, Woodland, CA
