

Staff Workshop
on
Natural Gas Pipeline Safety and Integrity Management
Current Research and Future Research Needs and Opportunities

California Energy Commission
Rosenfeld Hearing Room

9:30 A.M. – 4:00 P.M.
July 16, 2015

Purpose

- Exchanging information and seeking input from stakeholders on the Natural Gas Pipeline Safety and Integrity Management research areas.
 - Are we emphasizing the right research areas?
 - Are there any missing opportunities and research gaps?
 - Are there opportunities for collaborations to avoid duplication and generate new ideas?
- Alerting Energy Commission staff to possible duplication of efforts.
- Advising Energy Commission staff on opportunities to gain synergies in research efforts and cost-sharing.
- Facilitating the effective transfer and use of research results.

Panel Discussion

- Panelists' and Stakeholders' comments on the Natural Gas Pipeline Safety and Integrity Management research areas.
 - Are we emphasizing the right research areas?
 - Are there any missing opportunities and research gaps?
 - Are there possible duplication of efforts?
 - Are there opportunities for collaborations to avoid duplication, gain synergies, and generate new ideas?
 - How can we avoid duplication and gain synergies in research efforts?
 - How can we facilitate the effective transfer and use of research results?
