* "Unspecified sources of power" means electricity from transactions that are not traceable to specific generation sources. **For purposes of this report CNE has allocated its purchases of unspecified system power to the power mix calculated by the CEC for 2013 and added the values to the specific RPS purchases CNE made in 2013 to better reflect presumed fuel sources rather than labeling all purchases from the market as "unspecified".**

** Percentages are estimated annually by the California Energy Commission based on the electricity sold to California consumers during the previous year. 2013 Total System Power data is available from the CEC at http://energyalmanac.ca.gov/electricity/total_system_power.html.
