POWER CONTENT LABEL

PWP wants its customers to make informed choices about the energy they buy. The Power Content Label is an annual report that shows from which sources your electricity was generated during the previous calendar year. For comparison, the Power Content Label also provides the most recent supply content breakdown for the statewide power mix (as reported by the California Energy Commission).

2013 Power Supply Content
(Revised August 2014)

ENERGY RESOURCES	2013 PWP POWER MIX ³ (Actual)	2013 PWP GREEN POWER MIX ⁴ (Actual)	2013 CA POWER MIX ² (for comparison)
Eligible Renewable Total	27%	100%	19%
- Biomass & Waste	16%	16%	3%
- Geothermal	7%	7%	4%
- Eligible Hydroelectric	1%	1%	1%
- Solar	<1%	7%	2%
- Wind	3%	69%	9%
Coal	52%	0%	8%
Large Hydroelectric	5%	0%	8%
Natural Gas	5%	0%	44%
Nuclear	7%	0%	9%
Unspecified Sources of Power¹	4%	0%	16%
TOTAL	100%	100%	100%

1. "Unspecified sources of power" means electricity from transactions that are not traceable to specific generation sources.
2. Percentages are estimated annually by the California Energy Commission (CEC) based on the electricity sold to California consumers during the previous year.
3. "PWP Power Mix" represents all sources of energy procured by PWP and provided to all customers (including Green Power Program customers).
4. Additional resources procured to achieve the 100% renewable power supply for the Green Power Program include solar and wind resources.

ALL PERCENTAGES ARE ROUNDED.

For specific information about this electricity product, contact the PWP Answerline at (626) 744-6970. For general information about the Power Content Label, visit the [California Energy Commission web site](#) or call the CEC at 1 (800) 555-7794.

PWP Power Mix 2007-2013
(Revised July 2014)

Calendar Year	2007	2008	2009	2010	2011	2012	2013
Eligible Renewable Total	8%	8%	9%	16%	24%	24%	27%
- Biomass & Waste	5%	6%	5%	8%	13%	14%	16%
- Geothermal	1%	1%	2%	2%	1%	3%	7%
- Eligible Hydroelectric	<1%	1%	1%	<1%	2%	5%	1%
- Solar	<1%	<1%	<1%	<1%	<1%	<1%	<1%
- Wind	1%	1%	1%	6%	8%	2%	3%
Coal	65%	60%	61%	54%	56%	44%	52%
Large Hydroelectric	7%	6%	5%	4%	4%	4%	5%
Natural Gas	15%	20%	18%	13%	7%	13%	5%
Nuclear	5%	6%	6%	6%	6%	7%	7%
Unspecified Sources of Power¹	N/A¹	N/A¹	N/A¹	7%	3%	8%	4%
TOTAL	100%	100%	100%	100%	100%	100%	100%

1. The CEC accounting treatment for Unspecified Sources of Power was revised in 2010. Through 2009, energy from Unspecified Sources was allocated to each of the listed energy resource categories based on the applicable California Power Mix.

FREQUENTLY ASKED QUESTIONS

Q. What is the Power Content Label?

A. The Power Content Label is an annual report that shows the various sources used to supply your electricity. For comparison, the Power Content Label also provides the most recent supply content breakdown for the statewide power mix.

Q. What is the difference between "PWP Power Mix" and "PWP Green Power"?

A. "PWP Green Power" is the energy provided to customers enrolled in the PWP Green Power program. The "PWP Power Mix" is the energy provided to all of PWP's customers, including those enrolled in the Green Power
