\* "Unspecified sources of power" means electricity from transactions that are not traceable to specific generation sources.

\*\* Percentages are estimated annually by the California Energy Commission based on the electricity sold to California consumers during the previous year.

\*\*\* Glendale uses the lowest cost resources and renewables to provide for retail sales. The difference between Retail Sales and total Purchases is deducted from the Natural Gas and Unspecified Power categories. The percentage of Renewables will differ from the RPS Compliance for 2014 due to the specific regulations. In addition to the Renewable Energy kWh purchased for retail sales, Glendale purchased 901 unbundled TRECs for compliance with the RPS POU requirement.

\*\*\*\* All percentages are rounded.
