RE: Will Serve Letter for Almond Power Generation Facility Process Wastewater

Dear Mr. Baysinger:

They City of Ceres is willing to provide service to the Turlock Irrigation District Almond Power Generation Facility in the form of receiving process wastewater and disposing of it in the Treatment Plant evaporation ponds. However, this service will be contingent upon the City and TID agreeing on mutually beneficial terms in the form of a Second Amendment to the Water Services Agreement dated September 14, 1992.

The amendment must include provisions defining maximum gallons per day and per annum wastewater flows and an "Out" clause should the Regional Board impose new restrictions to treatment or receipt of wastewater flows that would prevent the City from accepting the process wastewater. In such an event TID must be prepared to follow an alternate course of action for disposal of the Power Generation Facility process wastewater.

If you have any questions, feel free to call me at (209) 538-5748.

Sincerely,

Phil Scott  
Director of Public Works

C: Wastewater Supervisor, City Engineer, City Manager.
