

## **Section 4 PUBLIC HEALTH AND SAFETY**

---

The following sections provide a description of the modifications proposed to the BSPP as they may affect the assumptions, rationale, and Conditions of Certification in the Commission Final Decision. As discussed in Section 2 of this Petition, PVSI has not yet selected the exact combination of fixed tilt and single access tracking PV modules for the site. Such selection will be made as part of the final design of the BSPP. However, where there are differences between the two systems, PVSI has included a comparison of each for the Commission to consider a “worse-case” for each technical area. Ultimately the selection of either fixed-tilt or tracking PV systems or a combination of both systems will not affect: the amount of land that is assumed to be considered impacted and upon which mitigation is based; the construction methodologies or types or quantities of equipment necessary to construct the project and therefore construction emissions will be the same; or the hazardous materials or waste generated.
