I am a resident of Carlsbad and do not want a second power plant on our coastline. Addition of such a plant would further endanger the coastal ecosystem, hurt property values that are already depressed throughout the city and provide little if any economic prosperity for the residents of Carlsbad through job creation or lower energy rates. The plan to put a power plant in Carlsbad needs to be reconsidered and ultimately scrapped, as Carlsbad already has to deal with an outdated monstrosity that provides little or no benefit to the community.

Thank you for your consideration,

John Johnson
Resident of the City of Carlsbad
