**NOTICE OF RECEIPT
PETITION TO AMEND
THE ENERGY COMMISSION DECISION FOR THE
COLUSA GENERATING STATION PROJECT (06-AFC-9C)**

On August 15, 2008, Pacific Gas and Electric filed a petition with the California Energy Commission requesting to modify the Colusa Generating Station (CGS) Project. The 660-megawatt project was certified by the Energy Commission on April 23, 2008, is currently under construction and is 19 percent complete. The facility is located within a 31-acre portion of a 100-acre parcel site leased from the Holthouse Ranch, 14 miles north of the community of Williams in Colusa County.

DESCRIPTION OF PROPOSED MODIFICATION

The proposed modifications in the petition would revise the general equipment arrangement, eliminate the diesel emergency generator, replace the diesel fire pump with an electric fire pump, eliminate the auxiliary boiler, relocate the natural gas metering station, incorporate a natural gas water bath heater system and a wet surface air cooler.

ENERGY COMMISSION REVIEW PROCEDURES

The purpose of the Energy Commission's review process is to assess the impacts of this proposal on environmental quality, public health and safety. The review process includes an evaluation of the consistency of the proposed changes with the Energy Commission's Decision and if the project, as modified, will remain in compliance with applicable laws, ordinances, regulations, and standards (Title 20, Calif. A public hearing for the purpose of approving or denying the amendment proposal will subsequently be held at a regularly scheduled Energy Commission business meeting.
