Sacramento, CA 95814

Subject: **Metcalf Energy Center 99-AFC-3**
Monthly Compliance Report #39, December 1 – December 31, 2004

Dear Mr. Munro:

In accordance with the CEC Commission Decision, enclosed please find a Monthly Compliance Report (Report) and Compliance Matrix for the Metcalf Energy Center. This report is for the period December 1 – December 31, 2004.

The Report lists those Conditions of Certification that require submittal with the Monthly Compliance Report as stated in the Commission Decision. These submittals are listed in the Report and are attached.

Updates for condition CUL-7 are no longer necessary due to the completion of major and other planned excavations. Monitors will continue to be notified prior to applicable excavations.

A copy of this report is also being submitted to the library nearest the project site, Santa Teresa Branch Library, as required in the Commission Decision.

If you have any questions please call me at (408) 361-4805.

Sincerely,

Mark Smolley
Compliance Manager
Metcalf Energy Center

Monthly Compliance Report #39
December 1 – December 31, 2004

1. **Project construction status**

Foundations: Continued installation of minor foundations throughout all areas of the plant. Continue area paving as weather permits.

Excavation: Continued excavation for minor foundations. Continued backfilling activities around foundations as required.

Equipment: Continued erection of steam turbine. Continued with erection of steel enclosure for Steam Turbine Generator. Continued work on major equipment; combustion turbines, generators, starting packages and support equipment. Continued with installation of process piping on all equipment. Hydro tested both HRSG's. Continue installation of piping in pipe rack. Continued with cable pulls. Continued with erection of cooling tower. Power was introduced into switchyard and power plant.

Underground Utilities Installation: Continue work on potable water system; 98% complete.

Material Preservation: All major pieces of equipment have been removed from long-term preservation. Equipment is being inspected prior to installation for any issues relating to the preservation.

Engineering: Engineering continues to support construction as needed, but engineering is 100% complete.

Activities planned for January 2005

Foundations: Continue work on miscellaneous minor foundations including: combustion turbine #2 containment trench, dumps pads and other cooling tower misc. pads.

Equipment: Ongoing alignment of auxiliary cooling pumps. Cleanup around and inside combustion turbines as the contractor prepares to turn over equipment to commissioning. Continue with installation of process pipe. Cleanup and walk down of cooling tower as contractor prepares to turnover the cooling tower. Continue setting equipment as foundations are completed.

Earthwork: Backfill along foundation and support installation of storm water piping. Continue work on minor foundations.

Underground Piping: Repair miscellaneous underground piping that is damaged by equipment. Continue installation of storm water system throughout the site.

Above Ground Piping: Continue loading pipe rack (support, erect, connect, test/restore) of pipe as it comes available. Continue to turnover systems to commissioning as they become available.

Underground Electrical: Continue cleaning of manholes while continuing installation of cable tray, and wire pulling.

Above Ground Electrical: Electrical contractor continues to pull cable, install cable trays and terminate systems.

Material Receiving and Preservation: Continue material storage and preservation as appropriate. Receive additional material for construction of plant.

MEC Litigation Update

1. STCAG, Phillip J. Mitchell, Jeffrey S. Wade, Timothy Alton and Great Oaks Water Company v. City of San Jose
   a. This case filed in Federal District Court seeks to invalidate the Cooperation Agreement between the City and Calpine for Metcalf. Calpine was not named as a party. The City has filed a motion to dismiss.
   b. The City's motion to dismiss was heard on June 25, 2004. The STCAG lawsuit against the City of San Jose was dismissed on statute of limitations grounds.
   c. *The Ninth Circuit Court rescheduled the briefing to begin in January. The hearing date will be set once the briefing is complete.*

Subject: December 2004 Monthly Compliance Report for the Metcalf Energy Center Biological Resources Mitigation Monitoring

Dear Jeff:

Please find attached the Biological Resources Mitigation Monitoring monthly compliance report for December 2004. The December report addresses our monitoring and consulting activities regarding biological resources from December 1, 2004 through December 31, 2004.

Please call me at (916) 286-0385 if you have any questions.

Sincerely,

BIOLOGICAL MITIGATION MONITORING

MONTHLY PROGRESS REPORT
December 2004

ACTIVITIES THIS MONTH

Task 1: Project Management and Coordinate Compliance Activities with CEC and Agencies (BIO-2)

- Project Management, contracts, and invoicing.
- Prepared November 2004 Biological Compliance Report.
- Consulted with Biological Monitor for ongoing construction activities.
- Completion of final enhancement plans, and approval from CEC, for nesting birds and native forage plant species for the MEC project that will occur within the MEC Ecological Preserve riparian corridor.

Task 2: Worker Environmental Awareness Training (BIO-6)

- The Calpine Site Safety Officer delivered the training program for 58 onsite personnel (a total of 2562 Calpine employees and/or contractors were trained through December 31, 2004).

Task 3: On-site Compliance Monitoring (BIO-2, FW-1 & 5)

- Monitored main site construction as required and at least once per week.
- Remained on-call throughout the month.

Task 4: Monitoring Riparian Corridor Enhancement (BIO-2 and BIO-5)

- None this month.

Task 5: Potential Out-of-Scopes

- The task to coordinate and prepare enhancement plans for nesting birds was not included in the proposed mitigation monitoring plan. These costs are being tracked separately. Currently, the costs are within the proposed budget, however, if the overall budget at the end of the monitoring year is exceeded, CH2MHILL would request additional funds to cover those costs.

OUT OF SCOPE EFFORTS

Out-of-scope efforts are being tracked separately under Task 5 and for potential Purchase Order Modifications in the future. The only potential out-of-scope costs incurred in December is the bird enhancement task mentioned above. Each monthly invoice identifies the out-of-scope efforts for that month as well as the status of the overall budget. When necessary, out-of-scope activities will be invoiced separately. Each invoice will be accompanied with a separate progress report, when appropriate. Separate purchase orders will be submitted at the end of the year only if the out-of-scope costs exceed the total Time and Materials contract amount for the 2004 mitigation monitoring.

INTRODUCTION

The Metcalf Energy Center (MEC) site is located in the Santa Clara Valley within the Urban Service Area of south San Jose. The MEC will be a 600-megawatt natural-gas-fired combined cycle power plant with the following features:

- A 230-kilovolt (kV) switchyard and approximately 240 feet of new 230-kV transmission line that loops into the existing Pacific Gas and Electric (PG&E) 230-kV Metcalf-Monta Vista No. 4 transmission on Tulare Hill.
- An approximately 1 mile, 16-inch natural gas pipeline that connects to an existing PG&E transmission backbone pipeline that runs along the eastern side of U.S. 101.
- An approximately 1000-foot recycled water pipeline from a tap into a new South Bay Water Recycling Program's (SBWR) pipeline for cooling water.
- An approximately 1.2-mile potable water pipeline will supply domestic and backup water supplies.
- A stormwater detention basin and discharge outfall structure to Fisher Creek.
- A new access road from Monterey Road at the Blanchard Road junction and visual screening and landscape corridor along the new access road that will require 6 acres of agricultural land south of the MEC site.
- A second access road (west access road) may extend from Santa Teresa Boulevard to the MEC site that will require 2.0 acres of agricultural land.
- Two temporary construction laydown yards totaling 24.8-acres are located in agricultural land south of the MEC site.

The project was designed to avoid significant adverse impacts to sensitive biological resources to the furthest extent feasible. Mitigation measures were developed through consultation with the U. S. Fish and Wildlife Service (USFWS), U. S. Army Corps of Engineers (Corps), National Marine Fisheries Service (NMFS), California Department of Fish and Game (CDFG), and the San Francisco Bay Regional Water Quality Control Board (Water Board) to minimize unavoidable project impacts. Permits and authorizations from these agencies included conditions that must be monitored by the Designated Biologist. The Biological Monitor will be available during all phases of construction to ensure compliance with the mitigation measures outlined in the *Biological Resources Mitigation Implementation and Monitoring Plan* (BRMIMP). The following report includes all MEC project activities monitored during December 2004.

MONITORED MITIGATION MEASURES

Mitigation measures were developed through consultation with USFWS, NMFS, CDFG, Water Board, Corps, and California Energy Commission (CEC) for the MEC project. Compliance with any conditions of the Corps, Water Board, and CDFG permits will be included when permits are received and used on the project.

Conditions of Certification (COC) BIO-1 through BIO-13 were in compliance during December 2004.

The following conditions described in the USFWS Biological Opinion (BO) remained pertinent to the December monitoring efforts:

- Garbage must be removed from the site.
- Activity must be limited to the minimum necessary.
- The boundaries of the site will be clearly marked.
- All equipment, personnel, and access shall be confined to designated work areas and connecting roadways.
- Refueling will occur at least 50 feet away from aquatic habitats.
- Weekly California red-legged frog surveys will be conducted in work areas.
- Bullfrogs found during amphibian surveys, including adult, subadult, and larval bullfrogs, shall be captured and killed.
- The Biological Monitor will inspect the erosion control features during rain events or other water releases.
- Concrete trucks must be washed within a designated area with a surrounding berm.

The Biological Monitor was available throughout the month to respond to biological issues as needed. December activities are described in the following section.

SUMMARY OF ACTIVITIES

This report provides a summary of December project activities and associated biological monitoring. A cumulative wildlife species list is included in Appendix A. WEAT sign-in sheets are included in Appendix B. The Biological Monitor completed daily logs summarizing activities, personal interactions, and observations. These logs are available on request.

Site Construction

December main site construction included ongoing excavation for and installation of underground utilities, and continued installation of concrete foundations and structures. In addition, aboveground infrastructure installation included heat recovery steam generator (HRSG) components, cooling towers, and other equipment. Offsite activities included re-installation of the potable water line. Many of these activities will continue during January 2005 until project completion, expected in June 2005.

The Biological Monitor visited the site weekly and as needed to inspect construction activities. Monitoring visits focused on ensuring that work complied with CEC biological COCs and to determine future monitoring needs. Main site construction activity was limited to previously disturbed areas and remained outside the Fisher Creek riparian corridor.

Underground Utilities

Excavation and installation of underground utilities on the main site continued in December. Water and/or gas conveyance pipes, and electrical conduit were installed and open excavations were back-filled with concrete and/or soil. All open trenches and excavations include wildlife escape ramps and exposed pipe and conduit ends were capped to prevent wildlife entry/entrapment. There were no reports or observations of wildlife entrapment throughout the month. Underground utility installation activities should be completed in the next few months.

Concrete Foundations

Activities included installation of concrete forms and rebar, and concrete pouring for various concrete structures. Concrete mixer trucks were cleaned in the designated concrete washout prior to leaving the project site. Minor concrete work will continue in the coming months.

Aboveground Infrastructure

Equipment continued to be transported from the laydown yards to the main site, where it is being installed on completed foundations. These activities will likely diminish during the upcoming months.

Potable Water Line

Excavation and realignment of a portion of the potable water line previously completed in September 2004 began this month. Approximately 1,900-feet of pipe was buried at the wrong location south of Blanchard Road along the UPRR. Proper placement requires

movement of the pipe within a new trench approximately 1 to 4 feet from the original alignment. Re-alignment activities will continue next month.

WORKER ENVIRONMENTAL AWARENESS TRAINING

The WEAT program was developed exclusively for the MEC project. Program materials include a handbook, video, and poster. As required by COC BIO-6 from the CEC *Commission Decision,* all new employees must attend the WEAT program.

Fifty eight personnel received WEAT training in December for a total of 2562 employees trained at MEC. A Calpine Site Safety Officer administered the WEAT training. A list of December WEAT attendees is included in Appendix B. Signed affidavits are kept on file by Calpine's Compliance Manager.

GENERAL NOTES AND OBSERVATIONS

There was no noteworthy wildlife activity or new species observations within the project site this month.

Calpine personnel continued to perform periodic SWPPP compliance inspections of project BMPs. The Biological Monitor will continue to aid the Environmental Compliance Manager as necessary in site preparation for rain events and ensure installed BMPs are in good repair and are functioning properly.

Erosion/sedimentation control practices including street sweeping, use of the tire wash station, and maintenance of previously installed devices (e.g. straw rolls, silt fence, etc.) occurred. Dewatering of surface stormwater was directed into non-sensitive areas.

This month, the silt fence defining the boundary of the Fisher Creek riparian corridor was removed due to disrepair and diminished utility. The fence was originally installed December 2001 and had become dilapidated and worn from prolonged weathering. Access to the riparian corridor is prevented by the chain-link, site security fence and a silt fence is maintained within that fence line.

Cumulative Wildlife Species Observed In or Near the Metcalf Energy Center Project and Linear Facilities Area (May 2001 to December 31, 2004) (Continued)

Common Name	Scientific Name	Location
MAMMALS		
Common raccoon	*Procyon lotor*	FC**(track)
Striped skunk	*Mephitus mephitus*	TH**(track), GP
Opossum	*Didelphis marsupialis*	EC
Domestic dog	*Canis familiaris*	EC
Coyote	*Canis latrans*	TH, SS
Feral cat	*Felis catus*	EC
Mountain lion	*Puma concolor*	GP**(tracks)
Bobcat	*Lynx rufus*	CC** (carcass), GP
California ground squirrel	*Spermophilus beechyi*	EC, FC, TH, TL, GP
Western gray squirrel	*Sciurus griseus*	FC
Valley pocket gopher	*Thomomys bottae*	LA**(carcass), SAR, GP
California vole	*Microtus californicus*	FC, EC
Deer mouse	*Peromyscus maniculatus*	TH, EC
Dusky-footed woodrat	*Neotoma fuscipes*	GP**(lodge)
Norway Rat	*Rattus norvegicus*	EC
Common muskrat	*Ondatra zibethicus*	FC
Brush rabbit	*Sylvilagus bachmani*	GP
Black-tailed jackrabbit	*Lepus californicus*	EC, TH, CTP
Feral pig	*Sus scrofa*	CC**(carcass), GP**(scat)
Tule elk	*Cervus nannodes*	CR
Black-tailed deer	*Odocoileus hemionus*	FC, GP, CC

Location:

CC = Coyote Creek Riparian Corridor
CR = Coyote Ridge
EC = Metcalf Energy Center Plant Site
FC = Fisher Creek Riparian Corridor
GP = Gas Pipe Line Corridor
TH = Tulare Hill Ecological Preserve
TL = Transmission Line Corridor

CONDITION OF CERTIFICATION PAL-4

PALEO MONTHLY SUMMARY REPORT

METCALF ENERGY CENTER
MONTHLY COMPLIANCE REPORT

Metcalf Energy Center Project
Paleontological Resource Monitoring and Mitigation Program

Monthly Report

Project Name: Metcalf Energy Center (MEC) **Project Number:** 01-17

Clients: Calpine/CH2M Hill **Month:** December 2004

Designated Paleontological Resource Specialist: Dr. Lanny H. Fisk, PhD, RG

Monthly Report for December 2004:

During the month of December 2004, PaleoResource Consultants (PRC) continued to work with Calpine Corporation through their environmental consultants, CH2M Hill, to mitigate potential adverse impacts to paleontological resources (fossils) resulting from construction of the Metcalf Energy Center (MEC) and associated linear facilities (including a natural gas pipeline, sanitary sewer line, water supply lines, and electrical transmission line) all located in south San Jose, California. In December, we were notified that no further project-related ground disturbance requiring paleontological monitoring was planned either at the MEC plant site or on any of the linear facilities. Calpine requested that we immediately proceed with preparation, identification, and analysis of the fossils salvaged from the project and preparation of a final report on paleontological mitigation.

A final list of paleontological resources salvaged during excavations for the MEC project revealed that fossil burrow and root casts (ichnofossils) were collected from paleosols (fossil soils) at five (5) localities; fossil wood (including charcoal) was collected from sixteen (16) localities; numerous microfossil samples were collected from depths down to 40 feet; and miscellaneous fossils (including recycled fossils) were collected from three (3) localities. Work has begun on preparation and identification of the fossil woods. Twelve (12) samples out of the 104 total microfossil samples collected have been chosen as representative of the stratigraphic section disturbed by MEC excavations; these will be submitted to a commercial laboratory for preparation of microscope slides, pollen and spores will be identified, and interpretations will be made of the ages of the sediments sampled and the changes in vegetation and climate recorded by them. A written report is in preparation describing all of the paleontological resources salvaged and their significance. Our goal is to have the final report to Calpine by the end of February 2005.
