**Subject : MOSS LANDING POWER PLANT PROJECT--DATA ADEQUACY  
RECOMMENDATION**

We have reviewed the Moss Landing Power Plant Project Application for Certification (AFC) filed by Duke Energy on May 7, 1999. We do not believe that the AFC meets the requirements of Cal. Code of Regs., tit. 20, § 1704, Appendix B. There are several sections of the AFC that we believe require additional information for data adequacy: air quality, biology, cultural resources, land use, socioeconomics, traffic and transportation, transmission system engineering, visual resources, and worker safety. Enclosed is a summary table and data adequacy worksheets for each section of the AFC. The worksheets for the aforementioned sections identify the additional information that we believe is necessary to fulfill the AFC data adequacy requirements.

In addition, we have received a letter from the Monterey Bay Unified Air Quality Management District indicating that the application is inadequate and does not contain the necessary information for them to begin their Determination of Compliance analysis. To satisfy the Energy Commission regulations, the AFC must contain the information required by the local air district.

In conversations with the California Coastal Commission, they indicate that they will be providing comments on the AFC. We expect to receive these comments next week. We will provide their report to you at that time.

If you have any questions, please call Paul Richins, Energy Commission's Project Manager, at (916) 654-4074.

KENT SMITH  
Acting Executive Director
